

Is it better? What does it cost?

THE COMMON DRUG REVIEW IS WORKING FOR ALL CANADIANS

Does a drug improve the health outcomes of patients?
Does it offer good value for Canada's drug plans?
These are the two fundamental questions the CDR answers in the interests of all Canadians.

Objective, scientific, transparent, accountable, effective...
The Common Drug Review (CDR) serves the public interest by assessing the clinical and cost-effectiveness of drugs before they are approved for formulary listing.
