TITLE: Interdisciplinary Teams for Patients with Chronic Kidney Disease or Kidney Transplant: Guidelines

DATE: 27 October 2008

RESEARCH QUESTION:

What are the guidelines for building an interdisciplinary team in a tertiary hospital for patients with chronic kidney disease or kidney transplant?

METHODS:

A limited literature search was conducted on key health technology assessment resources, including PubMed, the Cochrane Library (Issue 4, 2008), University of York Centre for Reviews and Dissemination (CRD) databases, ECRI, EuroScan, international health technology agencies, and a focused Internet search. Results include articles published between 2003 and October 2008, and are limited to English language publications only. Filters were applied to limit the retrieval to guidelines. Internet links are provided, where available.

RESULTS:

One evidence-based guideline was identified pertaining to building an interdisciplinary team for patients with chronic kidney disease or kidney transplant.

Guidelines and recommendations
