TITLE: Cataract Surgery Performed in Settings Other Than Hospital Operating Rooms: Clinical Effectiveness, Cost-Effectiveness, and Guidelines

DATE: 28 March 2013

RESEARCH QUESTION

What is the evidence regarding cataract surgery performed in other settings compared to hospital operating rooms?

KEY MESSAGE

No relevant literature was identified regarding cataract surgery performed in other settings compared to hospital operating rooms.

METHODS

A focused literature search (with the main concept appearing in title or subject heading) was conducted using key resources, including PubMed and The Cochrane Library (2013, Issue 2 of 12), University of York Centre for Reviews and Dissemination (CRD) databases, Canadian and major international health technology agencies, as well as a focused Internet search. No filters were applied to limit the retrieval by study type. Where possible, retrieval was limited to the human population. The search was also limited to English language documents published between January 1, 2008 and March 13, 2013. Internet links were provided, where available.

The summary of findings was prepared from the abstracts of the relevant information. Please note that data contained in abstracts may not always be an accurate reflection of the data contained within the full article.

RESULTS

Rapid Response reports are organized so that the higher quality evidence is presented first. Therefore, health technology assessment reports, systematic reviews, and meta-analyses are presented first. These are followed by randomized controlled trials, economic evaluations, and evidence-based guidelines.

Disclaimer: The Rapid Response Service is an information service for those involved in planning and providing health care in Canada. Rapid responses are based on a limited literature search and are not comprehensive, systematic reviews. The intent is to provide a list of sources of the best evidence on the topic that CADTH could identify using all reasonable efforts within the time allowed. Rapid responses should be considered along with other types of information and health care considerations. The information included in this response is not intended to replace professional medical advice, nor should it be construed as a recommendation for or against the use of a particular health technology. Readers are also cautioned that a lack of good quality evidence does not necessarily mean a lack of effectiveness particularly in the case of new and emerging health technologies, for which little information can be found, but which may in future prove to be effective. While CADTH has taken care in the preparation of the report to ensure that its contents are accurate, complete and up to date, CADTH does not make any guarantee to that effect. CADTH is not liable for any loss or damages resulting from use of the information in the report.

No relevant literature was identified regarding cataract surgery performed in other settings compared to hospital operating rooms. References of potential interest are provided in the appendix.

OVERALL SUMMARY OF FINDINGS

No relevant literature was found regarding cataract surgery performed in other settings compared to hospital operating rooms, therefore no summary can be provided.
REFERENCES SUMMARIZED

Health Technology Assessments
No literature identified.

Systematic Reviews and Meta-analyses
No literature identified.

Randomized Controlled Trials
No literature identified.

Economic Evaluations
No literature identified.

Guidelines and Recommendations
No literature identified.
