Title: Management of Coronary Artery Disease in Primary and Community Care: Guidelines

DATE: 17 July 2013

RESEARCH QUESTION

What are the evidence-based guidelines regarding the management of coronary artery disease (CAD) in primary care or community-based settings?

KEY MESSAGE

Three evidence-based guidelines were identified regarding the management of coronary artery disease (CAD) in primary care or community-based settings.

METHODS

A limited literature search was conducted on key resources including PubMed, University of York Centre for Reviews and Dissemination (CRD) databases, Canadian and major international health technology agencies, as well as a focused Internet search. Methodological filters were applied to limit retrieval to guidelines. Where possible, retrieval was limited to the human population. The search was also limited to English language documents published between Jan 1, 2008 and Jul 12, 2013. Internet links were provided, where available.

RESULTS

Three evidence-based guidelines were identified regarding the management of coronary artery disease (CAD) in primary care or community-based settings. Additional references of potential interest are provided in the appendix.

Disclaimer: The Rapid Response Service is an information service for those involved in planning and providing health care in Canada. Rapid responses are based on a limited literature search and are not comprehensive, systematic reviews. The intent is to provide a list of sources of the best evidence on the topic that CADTH could identify using all reasonable efforts within the time allowed. Rapid responses should be considered along with other types of information and health care considerations. The information included in this response is not intended to replace professional medical advice, nor should it be construed as a recommendation for or against the use of a particular health technology. Readers are also cautioned that a lack of good quality evidence does not necessarily mean a lack of effectiveness particularly in the case of new and emerging health technologies, for which little information can be found, but which may in future prove to be effective. While CADTH has taken care in the preparation of the report to ensure that its contents are accurate, complete and up to date, CADTH does not make any guarantee to that effect. CADTH is not liable for any loss or damages resulting from use of the information in the report.
