

Health Technology Expert Review Panel (HTERP) Dr. Sandor Demeter — Conflict of Interest Disclosure
(Dated February 5, 2020).

Dr. Sandor Demeter is a physician with more than three decades of experience in public health and nuclear medicine. He was intimately involved in managing the impact of the medical isotopes crisis in his own jurisdiction and has recently authored a chapter in a 2018 OECD publication on the economically sustainable and secure supply of radioisotopes used in medical imaging.

Dr. Demeter also has a five-year appointment with the Canadian Nuclear Safety Commission (CNSC), from 2018 to 2023. The CNSC reports to Parliament. Dr. Demeter serves Canadians as a Governor in Council-appointed, part-time commission member. He also served on the International Commission on Radiological Protection (ICRP), Committee 3 (Protection in Medicine), from July 2013 to June 2017, and is now in his second term (2017 to 2021). The ICRP is an international guideline-setting organization for radiation protection. This is a volunteer position for which only travel and associated expenses may be paid (i.e., no honorarium or salary).
