

# ***Local HTA Approaches, Successes Stumbles & Lessons***

***Paule Poulin  
Trevor Schuler***

***Hospital/Regional HTA: Local Evidence-Based Decisions  
for Health Care Sustainability***

***November 18-19, 2013  
Ottawa Convention Centre***

# Presentation Outline

---

1. Context
  - Background on Strategic Clinical Networks
2. Approach
  - Local HTA Decision Support Program
3. Successes
  - Evidence informed decision making
4. Challenges
  - Stumbles
5. Lessons Learned

# Context: Strategic Clinical Networks

---

## What are SCNs?

- Collaborative teams with a strategic mandate that bring together the perspectives of all stakeholders
- Aimed at improving health care delivery
  - Alberta Quality Metrics for Health  
Acceptability, Accessibility, Appropriateness  
Effectiveness, Efficiency, Safety
- Building sustainability

## Why SCNs ?

---

- Ensure **collaboration & joint decision-making**
- Promote the **use/uptake** of research evidence
- Share **best practices** across the province
- **Share** knowledge, clinical experience and **learning** to **reduce variation and improve care**
- Be involved in **planning** for health-care service delivery
- Work together to develop new and innovative approach to care

# Current SCNs

---

Bone and Joint

Cancer

Critical care

Cardiovascular  
and Stroke

Seniors

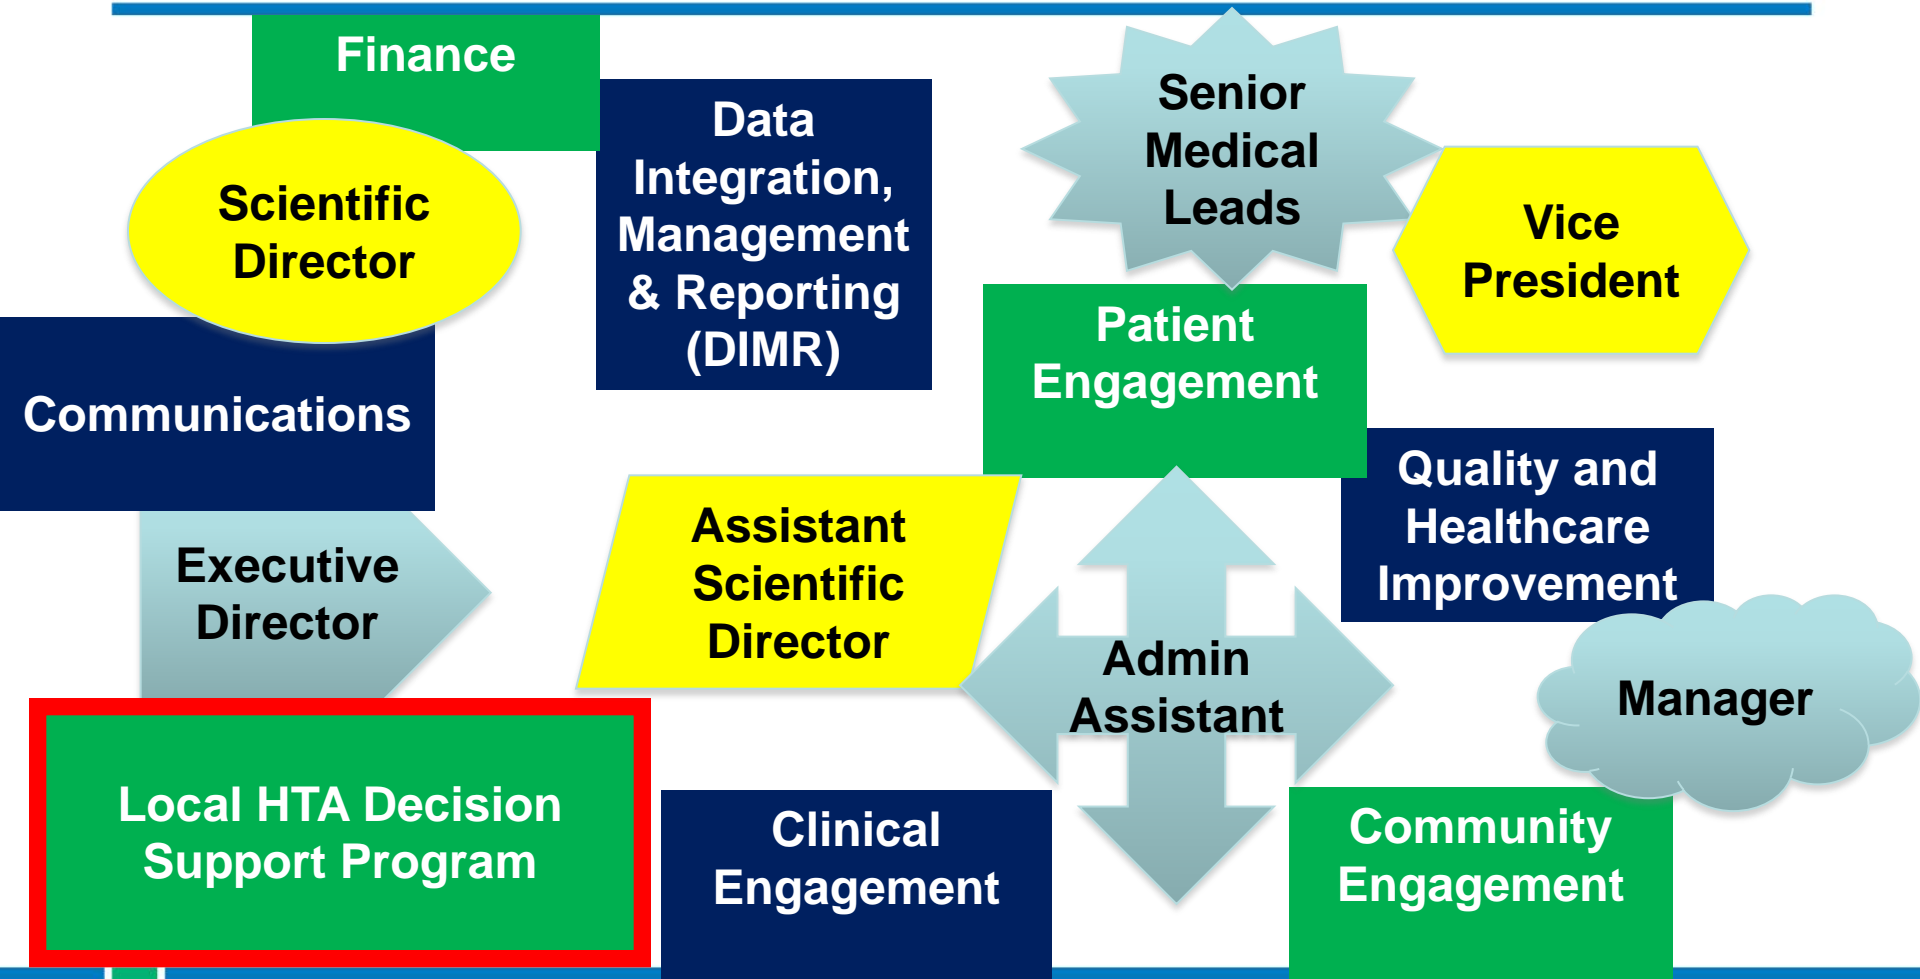

Emergency

Addictions and  
Mental Health

Obesity  
Diabetes and  
Nutrition

Surgery

# Who is involved in SSCN?

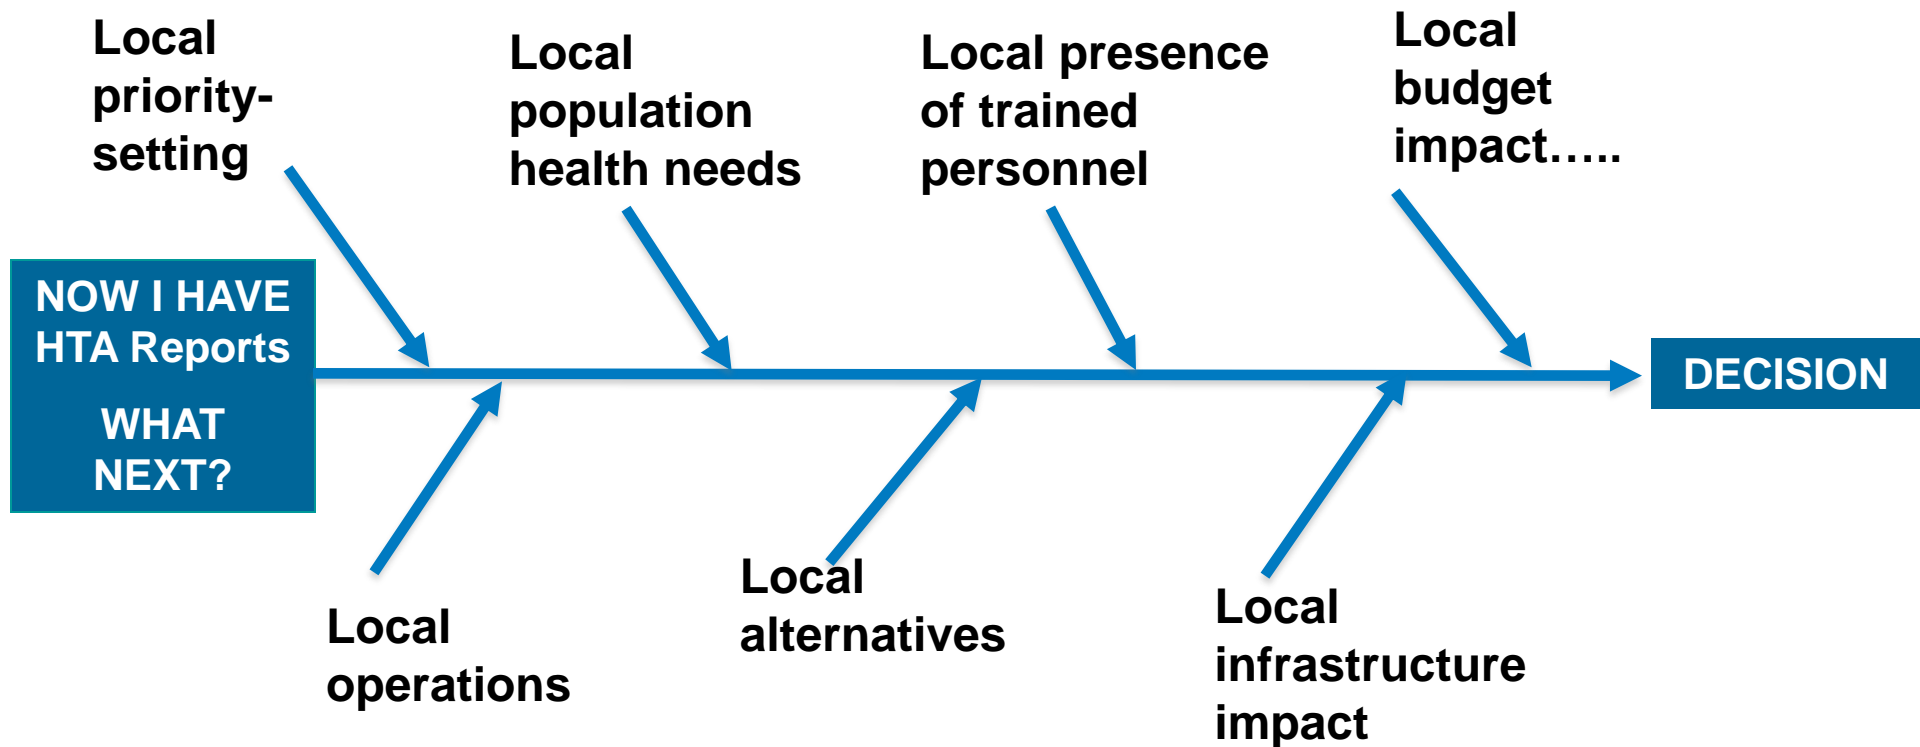

## 2. Approach: Local HTA Decision Support Program

# HTA Users: From Evidence to Decisions

---

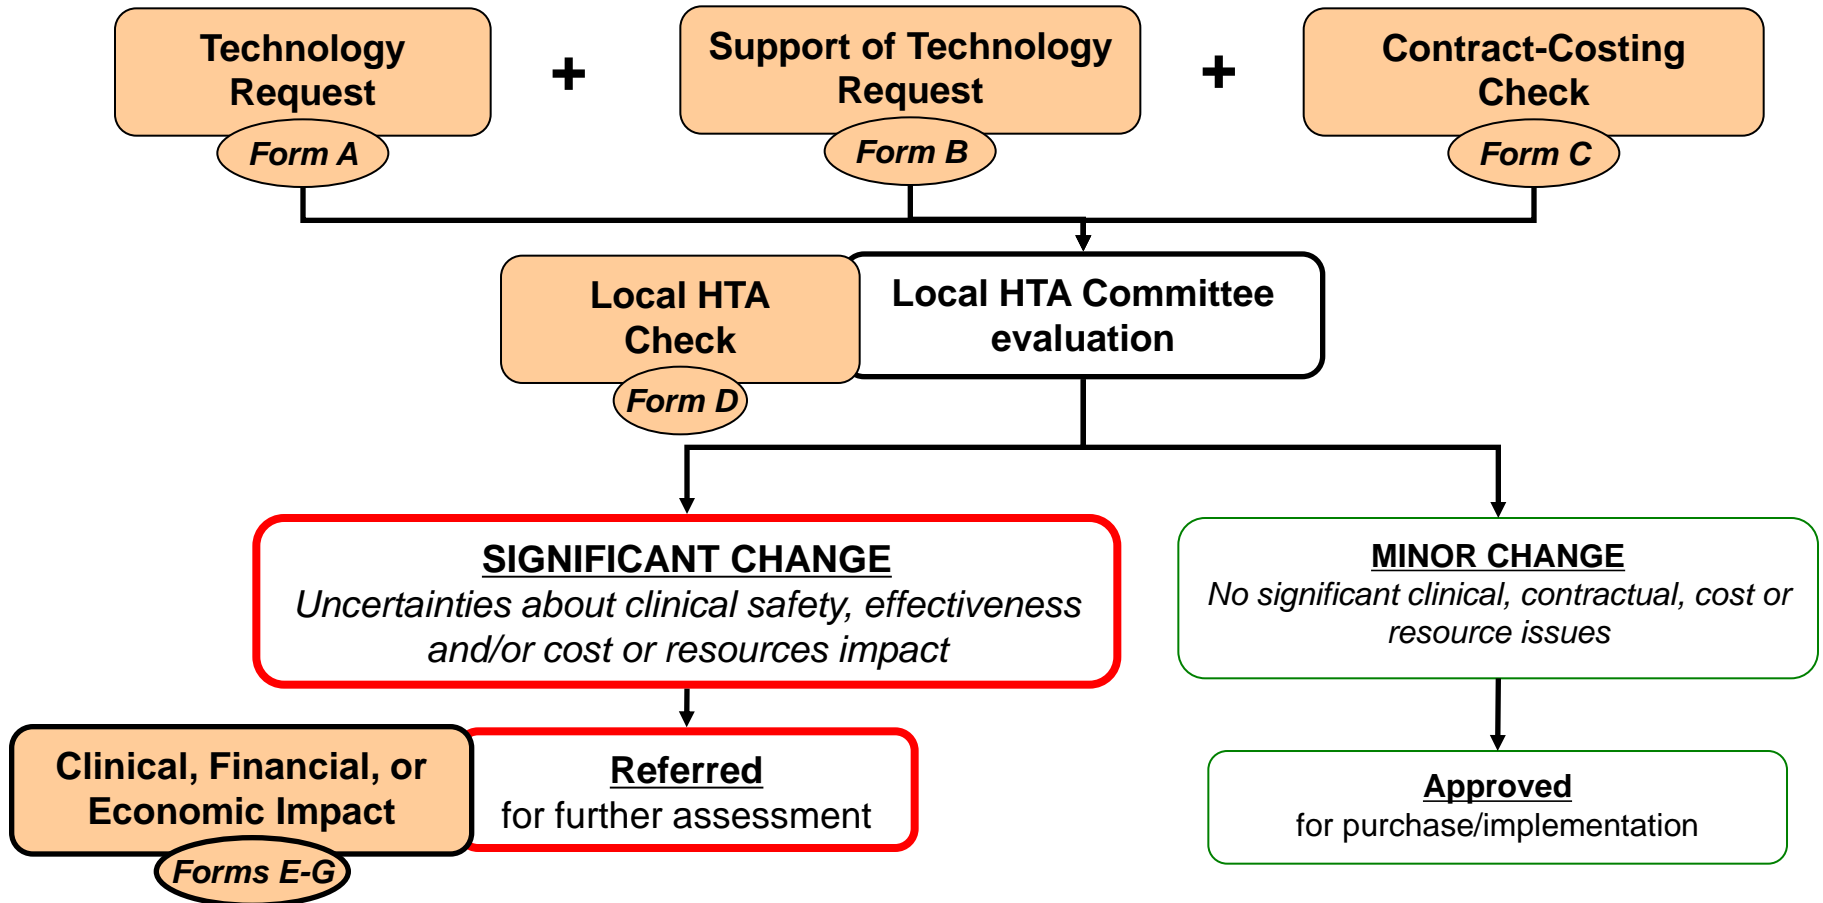

## **Local HTA Program Components**

---

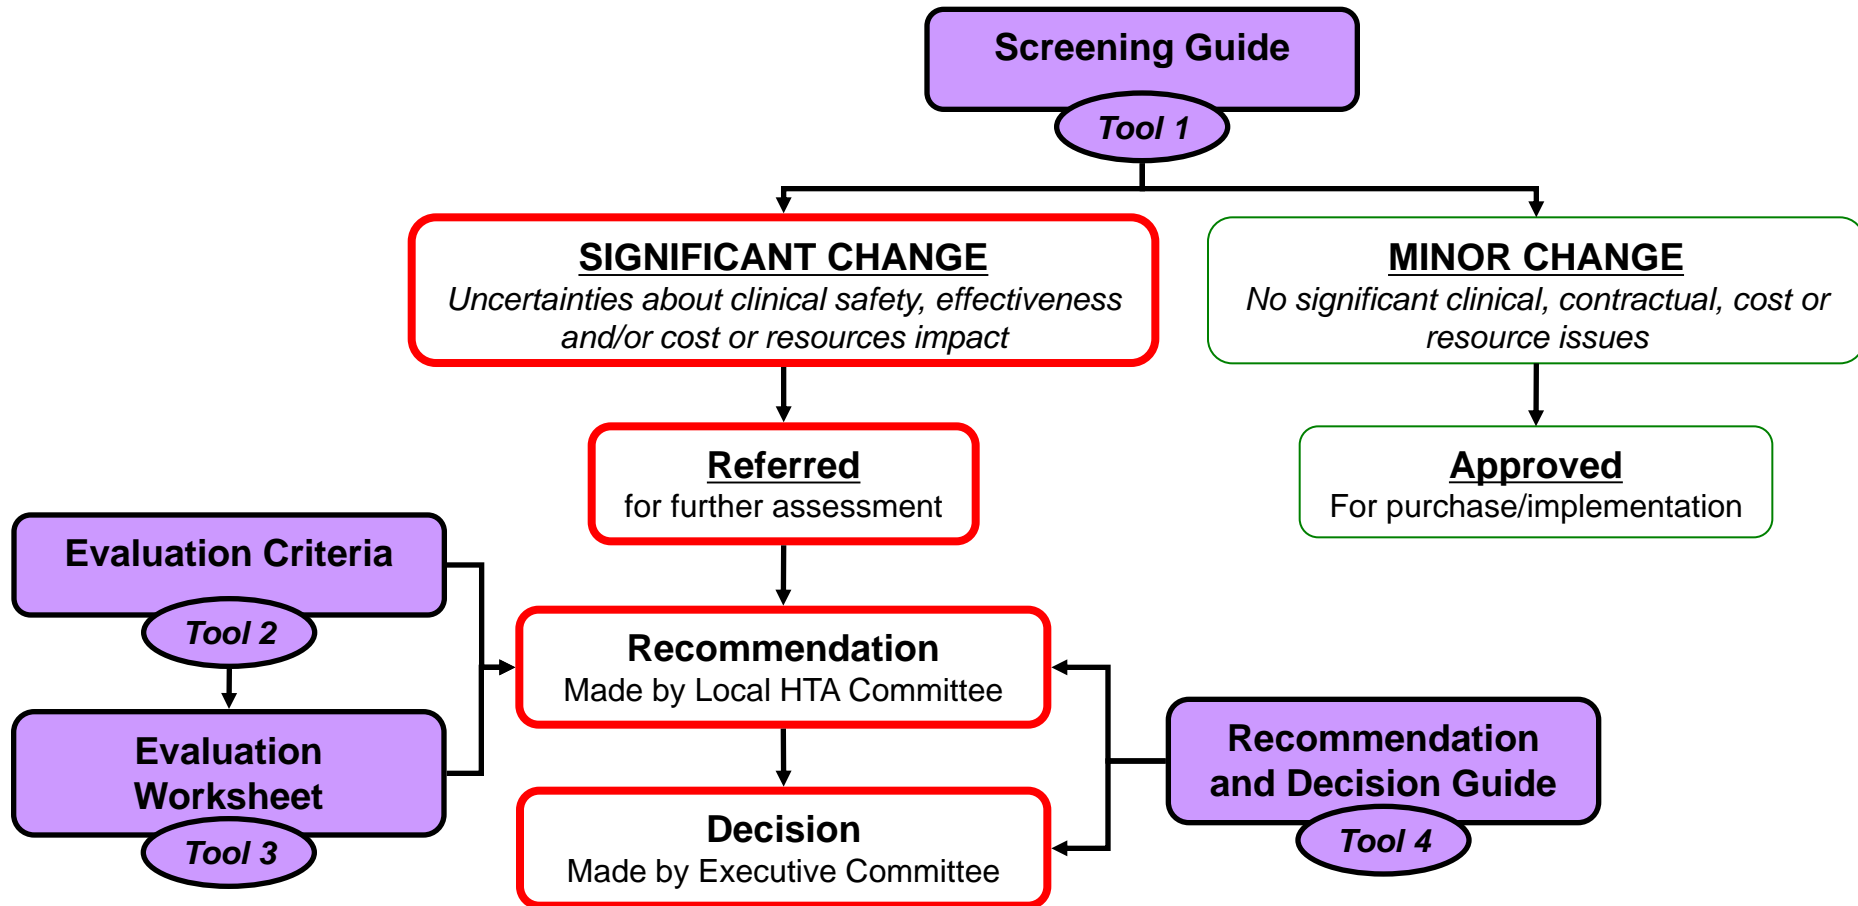

- A. HTA Policy**
- B. Local HTA Advisory Committee**
- C. Forms to Gather Information**
- D. Tools for Multi-Criteria Decision Making**

<http://www.albertahealthservices.ca/4470.asp>

## Forms to Gather Information

## Tools for Multi-Criteria Decision Making

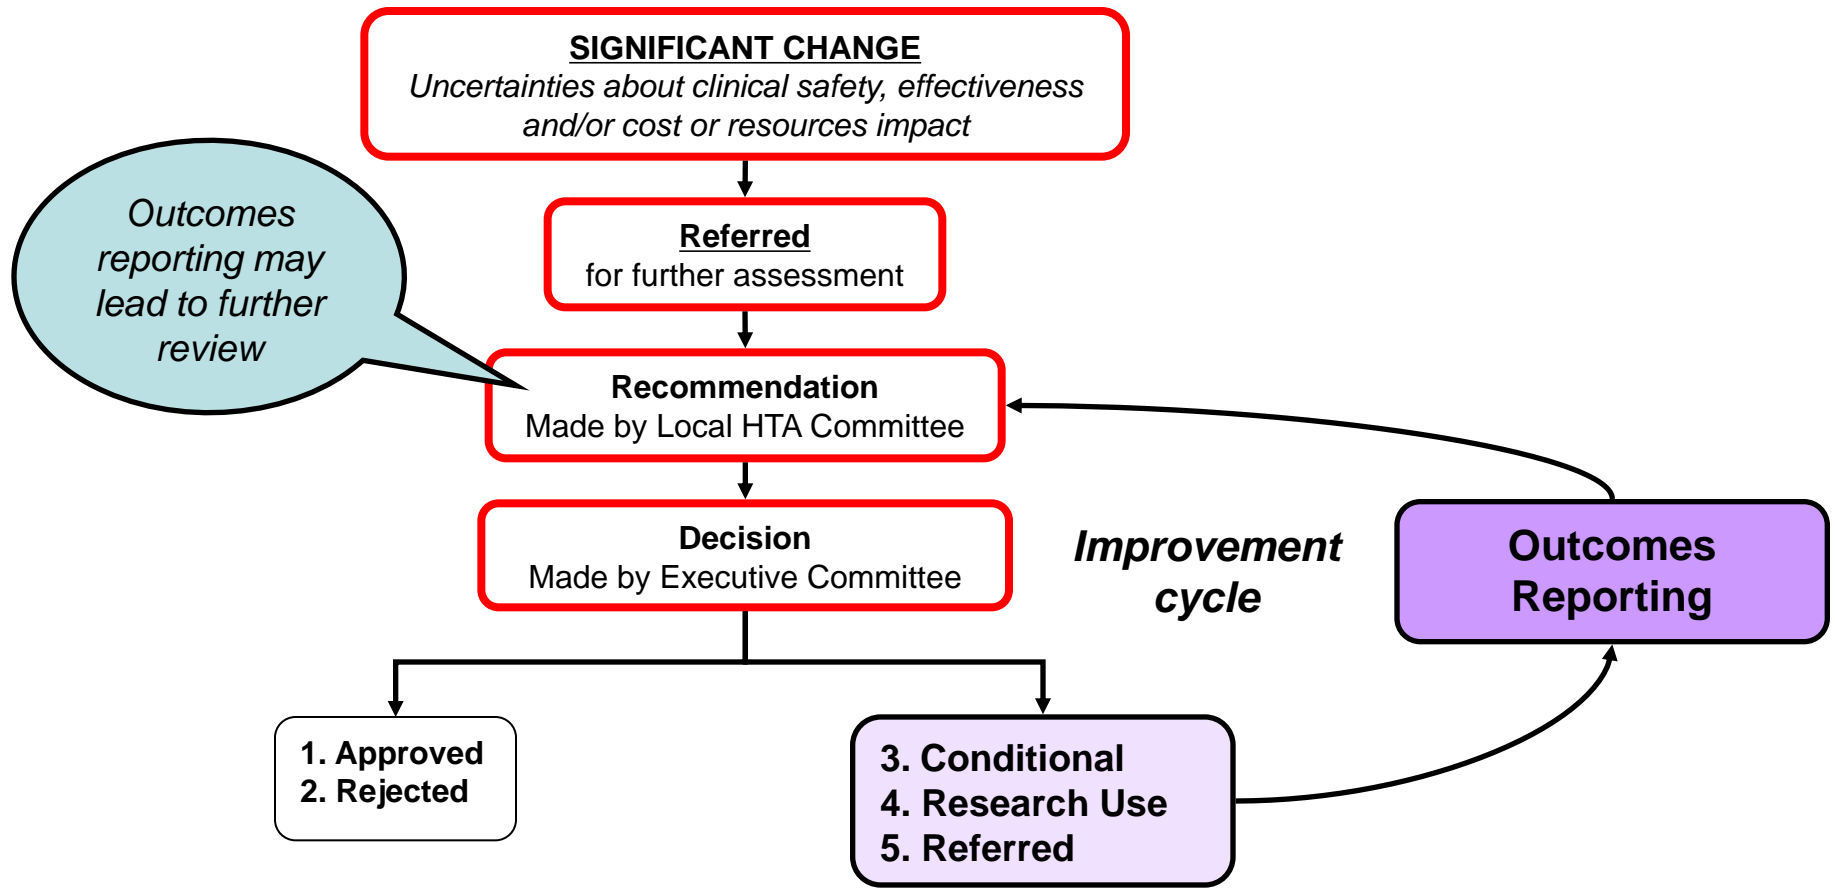

## Criteria for Evaluation

1. Description and Legal	
Domain (5)	Criteria (12)
2. Health Gain	<b>Efficacy</b> <b>Population Health</b> <b>Standard of Care</b>
3. Service Delivery	<b>Safety</b> <b>Training</b> <b>Access</b> <b>Service Coordination</b>
4. Strategic Fit	<b>Strategic Fit</b>
5. Innovation	<b>Knowledge &amp; Research</b>
6. Financial	<b>Cost</b> <b>Sustainability</b> <b>Economic Analysis</b>

## Recommendation and Decision Types

## Outcomes Reporting & Further Review

### 3. Successes

---

- Internal embedded to local environment -HTA requestor
- Internal embedded HTA receptor
- Multidisciplinary
- Collaboration – CADTH
- Education
- Engagement
- Optimal Use

## 4. Challenges (Stumbles)

---

### The Financial Stumble

- Evaluation request from OR Manager regarding urinary incontinence technology
- Review by CADTH
  - Evidence shows improved patient outcomes and estimated cost-saving to system
- SSCN-HTA Committee
  - Recommended for specific patient population

**However, local OR Manager's budget did not allow purchase**

## The Financial Stumble

---

### **THE STUMBLE:**

- No good process for advancing money from potential cost-savings to the larger health care system to allow local purchase
- Similarly, who should realize the benefits of cost-savings?
- Incentive??

## **The Implementation Stumble**

---

- **Laser Tx for tissue removal**
- **Reviewed and shown to be safe, effective & cost effective**
- **Approved for funding by Alberta Health**
- **Approved for purchase by AHS**

**However, tried, but abandoned for lack of improved  
Local outcomes**

## The Implementation Stumble

---

### **THE STUMBLE:**

- Lack of training resulted in lack of improved outcomes
- No systematic implementation or training plan

## The Outcomes Stumble

---

- **Technologies given recommendations for purchase based on our criteria**
- **But – did they actually deliver?**

## The Outcomes Stumble

---

### **THE STUMBLE:**

- No outcomes measures built into the implementation plan when technology are approved
- Often very difficult to do

## The Organizational Stumble

---

- **HTA processes require education and support of many members in a health care organization**
- **Many hours of effort given to educational sessions, workshops, and building relationships**
- **Relationships lost when positions change**

## The Organizational Stumble

---

### THE STUMBLE:

- Constantly shifting organizational structures means losing educated HTA champions and relationships

## 5. Lessons Learned

---

- **HTA Education – undergraduate medical and nursing education**
- **Engagement & collaboration**
- **Embedded & Integrated**
- **Built incentive for sustainability**
- **Share budget responsibilities**
- **Opportunity Cost**
- **Outcomes measures**

# Acknowledgement

---

**Surgery Strategic Clinical Network**

**CADTH**

**Research Portfolio**

**Local HTA Decision Support Program developers**

**AI-HS**

**collaborators**
