

Winson Y. Cheung, MD, MPH, FRCPC is a medical oncologist and a nationally and internationally recognized health services researcher. He is currently an Associate Professor of Medicine in the Department of Oncology at the University of Calgary where he is also the Chair and Provincial Director of the Health Services Research Program at Cancer Control Alberta.

Dr. Cheung received his medical degree at the University of British Columbia, medical oncology subspecialty training at the University of Toronto and subsequently obtained a Masters of Public Health degree at Harvard University. He specializes in the management of gastrointestinal malignancies. He is the recipient of numerous accolades, including the National Cancer Institute of Canada Dorothy Lamont Award, the Novartis Oncology Young Canadian Investigator Mentor Award, the Multinational Association of Supportive Care in Cancer Investigator Award, and several consecutive Merit Awards from the American Society of Clinical Oncology. He has secured over 5 million dollars in grant funding.

Dr. Cheung's primary research interest is health services and outcomes research, including patient reported outcomes, quality of life, and economic analyses. His projects focus on understanding the interplay of various patient, physician, system, and cost level factors that drive practice patterns in the real world setting and learning how these processes can be modified to better inform care. The overarching goal of his work is to ensure that cancer care is appropriately accessed and delivered to patients in the most cost-effective manner. To date, he has published over 100 peer-reviewed manuscripts.
