

## Adam Raymakers, BSc, MSc, PhD

Dr. Adam Raymakers is a Senior Health Economist in department of Cancer Control Research at BC Cancer (Vancouver, British Columbia). He is also a post-doctoral fellow in the Faculty of Health Sciences at Simon Fraser University. He holds a Bachelor of Science (Honours) degree in economics from Dalhousie University (Halifax, Nova Scotia), a MSc in Health Economics, Policy, and Law from Erasmus University (Rotterdam, the Netherlands), and a PhD in health economics and pharmacoepidemiology from the University of British Columbia (Vancouver, British Columbia). He has also completed a post-doctoral fellowship in the economic evaluation of medical devices with the J.E. Cairnes School of Business and Economics at the National University of Ireland Galway (Galway, Ireland). Adam also serves as an editor at the journals: *Health Policy and Technology*, *BMC Health Services Research*, and *Frontiers in Health Services*.

Adam's research interests lay in the areas of economic evaluation of new therapies. He is currently funded by a Michael Smith Foundation for Health Research (MSFHR) Research Trainee Award to explore issues around the cost-effectiveness of chimeric antigen receptor T-cell (CAR-T) therapies and gene therapies and adoptive cell therapies more broadly. Additional research interests include drug policy and approval/reimbursement processes, evidence assessment and uncertainty, the role of equity in the delivery of health care, and the intersection of health services research and climate change.
