Public Dental Programs and Reimbursement for Dental Restorative Procedures: An Environmental Scan
Context

Dental caries is a significant oral health problem worldwide. While the epidemiology of dental caries over time and across populations has changed, due to such factors as economic development, sugar consumption, and community water fluoridation, it remains an important cause of human morbidity. Symptoms can include pain and tooth loss. Downstream sequelae that negatively impact activities of daily living may result (e.g., school or work absenteeism). In Canada, data from 2007 show that 57% of children aged six years to 11 years, 59% of adolescents aged 12 years to 19 years, and 96% of adults have a history of dental caries.

Standard treatment for dental caries aims to restore the structure of the affected tooth using filling material to replace decayed dental tissue. Amalgam fillings have been widely used for more than 150 years, and evidence suggests that amalgam has been an effective and affordable dental restorative material. However, the perceived health risks and potential environmental impact of dental amalgam, due to the mercury it contains, are debated. On the international front, the Minamata Convention on Mercury, which Canada ratified in April 2017, specifically addresses the use of amalgam in dentistry. One concern arising from the proposed phasing down (and eventually phasing out) of dental amalgam is the impact on the cost of dental care, which may represent a significant barrier for some populations in Canada.

Among the alternatives to the use of amalgam as a restorative material for dental caries, composite resin is the most common, having been in use for over 50 years. Composite resin, because it is tooth coloured, may provide an advantage over amalgam for visible restorations in anterior teeth for aesthetic reasons. Given these considerations, there is interest in understanding the relative effectiveness of amalgam and composite resin restorations.

In this context, CADTH is undertaking a Health Technology Assessment (HTA) which will address the following policy question: Should dental amalgam continue to be used in Canada? The aim of the HTA is to inform the policy question through a comparative assessment of dental amalgam and composite resin — the most commonly used alternative. The economic review component of the HTA will address the following research question: What are the comparative consequences and costs of using dental restorations made of composite resin or amalgam for permanent teeth in Canada? Specifically, a cost-consequence analysis will be undertaken to compare costs and health outcomes associated with dental amalgams and composite resin as dental restorative materials for permanent posterior teeth.

In Canada, the majority of dental care is privately financed, commonly through employment-based insurance and out-of-pocket expenses. In 2010, the Canadian Health Measures Survey reported that 62.6% of Canadians had private insurance and only 5.5% of Canadians
had coverage through publicly funded programs, while the remaining 31.9% were uninsured.\textsuperscript{14} All jurisdictions publicly fund dental programs for “various groups, predominantly low-income populations, with the federal system largely defined by the care it targets to First Nations and Inuit populations, but including services for the armed forces, Veterans Affairs, RCMP [Royal Canadian Mounted Police], prisoners, and Citizenship and Immigration Canada.”\textsuperscript{13} The characteristics of those programs, such as the dental services covered, eligibility criteria, and reimbursement models, vary depending on the jurisdiction and the particular program. An Environmental Scan report on publicly financed dental care programs in Canada was published in 2015 under the direction of the Public Health Agency of Canada (PHAC) and covered several topic areas including identification of programs and legislation related to provincial and territorial public dental care activities, enumeration and remuneration of dental public health human resources, rates of reimbursement, and expenditures of direct and indirect service delivery activity.\textsuperscript{15} Nonetheless, the scan did not provide a comprehensive guide to reimbursement rates for dental restorative procedures across publicly funded dental programs, which is required to support the HTA being undertaken evaluating dental amalgams and composite resin for dental restoration of posterior teeth.

This project was adapted from the aforementioned PHAC Environmental Scan report on publicly financed dental care programs in Canada.\textsuperscript{15} In contrast to the broader scope of the PHAC report, this Environmental Scan focuses on gathering information on the costs and utilization of dental restorative procedures offered under the public dental care programs, with the aim of informing the economic component of the HTA.

Objectives

The objective of this Environmental Scan is to identify and summarize information regarding public dental programs in Canada. In addition, this Environmental Scan aims to present the volume of amalgam and composite fillings reimbursed and reimbursement rates for dental restorative procedures covered by these dental programs.

The following specific objectives are addressed:

1. Identify and describe Canadian publicly funded dental programs.
2. Obtain the annual number of services (claims) for composite resin (tooth-coloured) or amalgam fillings on permanent, posterior teeth that are funded by Canadian publicly funded dental programs.
3. Compare reimbursement rates for dental restorative procedures across programs.

Methods

This Environmental Scan is based on responses to the Public Dental Programs Survey (Appendix 1) and a limited literature search.
Literature Search
A focused Google search was conducted by an information specialist on information related to public dental programs in Canada and reimbursement rates. Identified articles were screened for selection and those that met the inclusion criteria (see Table 1) were synthesized and summarized within the report.

Research Questions
The literature review component of this Environmental Scan aimed to address the following questions:

1. What are the publicly funded federal, provincial, and territorial (F/P/T) dental programs in Canada?
2. What groups of patients are eligible under each program?
3. What are the current fee schedules in publicly funded F/P/T dental programs for dental restorative procedures on permanent teeth?

Survey
A survey was conducted to address gaps in knowledge not addressed by the literature search and to increase the robustness of findings. The survey was distributed electronically using Hosted in Canada Surveys (HICS) to key jurisdictional informants and stakeholders involved in planning, decision-making, management, and service provision related to public dental care in Canada. Attempts were made to contact one respondent per jurisdiction and/or known publicly funded dental care program in order to capture information relevant to all Canadian programs. Survey respondents provided an electronic signature to consent to the reporting of the information provided. Respondents were identified through existing contacts from the PHAC as well as knowledge of respondents from the previous Environmental Scan.

• Dental fees for restorative procedures | NA |
Findings
The information presented on publicly funded dental programs and reimbursement for dental procedures in Canada is based on a literature search. Due to limited complete survey responses, any available survey findings are included as personal communications.

Objective 1: Identify and describe Canadian publicly funded dental programs
The literature search identified evidence regarding publicly funded dental programs across Canada. Content was also derived from, and cross-referenced with, the PHAC Environmental Scan to fill in any gaps from the literature search. The following public dental programs were identified from the limited literature search. Programs not reported in the literature or captured from our grey literature sources may not be included.

Emergency dental services are covered in all of the provinces and territories across Canada. All of the provinces also fund programs that provide services for adults and children who require income assistance; however, these programs are not funded in the territories. The provinces of Québec, Nova Scotia, Prince Edward Island, and Newfoundland and Labrador provide treatment services for children regardless of income. Details of the publicly funded dental programs can be found in Appendix 3; Tables 2 to 15.

British Columbia
The province of British Columbia runs six publicly funded dental programs, including:
- the Medical Services Plan
- Dental Supplements (including the British Columbia Employment and Assistance Program's Dental Program)*
- Healthy Kids, Early Childhood Health and Screening Programs*
- the Children in Care Medical Benefits Program*
- the British Columbia First Nations Health Authority covers two programs:
  - the Children's Oral Health Initiative**
  - the First Nations Health Authority Health Benefits Program.*

Most notably, British Columbia has specific programs for First Nations. British Columbia is unique in that the federal Non-Insured Health Benefits (NIHB) program is managed by the British Columbia First Nations Health Authority. Programs indicated with an asterisk (*) cover dental restorations. The program indicated with two asterisks (**) covers temporary dental restoration, only (temporary fillings).

Alberta
The province of Alberta runs 10 publicly funded dental programs, including:
- the Alberta Health Care Insurance Plan
- the Assured Income for the Severely Handicapped Program*
- Alberta Works Income Support*
- the Alberta Child Health Benefit Plan*
- the Alberta Adult Health Benefit Plan*
- School Oral Health Services
- the Dental Assistance for Seniors Program*
• Reduced-Fee Dental Care for Qualified Low-Income Clients*
• Family Support for Children with Disabilities
• the Cleft Palate Dental Indemnity Program.*

The province of Alberta has additional programs geared toward adults and families with disabilities, seniors below a certain income level, and residents who have a cleft palate. Programs indicated with an asterisk (*) cover dental restorations.

Saskatchewan
The province of Saskatchewan runs four publicly funded dental programs, including:
• the Saskatchewan Medical Services Plan
• Family Health Benefits*
• the Supplementary Health Program*
• the Enhanced Preventive Dental Services Initiative.

Saskatchewan runs notable programs that cover individuals on disability and target school-aged children, providing many preventive dental services administered across the province at the regional level. Programs indicated with an asterisk (*) cover dental restorations.

Manitoba
The province of Manitoba runs four publicly funded dental programs, including:
• Manitoba Health Care Coverage
• the Employment and Income Assistance Program
• Healthy Smile Happy Child
• the SMILE plus Children's Oral Health Program.

Manitoba also covers preventive services for children in certain regional health authorities.

Ontario
The province of Ontario runs seven publicly funded dental programs, including:
• the Ontario Health Insurance Plan
• the Ontario Cleft Lip and Palate/Craniofacial Dental Program**
• Healthy Smiles Ontario*
• the Oral and Maxillofacial Reconstruction Program
• Ontario Works Adults
• Assistance for Children with Severe Disabilities**
• the Ontario Disability Support Program:**
  • The Special Dental Care Program.

Ontario has programs to support residents who have a cleft lip and/or palate, residents who require oral and maxillofacial reconstruction, and adults and children with disabilities. The program indicated with an asterisk (*) covers dental restorations. Programs indicated with two asterisks (**) may cover some restorative procedures.
Québec
The province of Québec runs four publicly funded dental programs, including:

- Régie de l'assurance maladie du Québec
- Régie de l'assurance maladie du Québec for Children*
- Régie de l'assurance maladie du Québec Low-Income Program (12 and 24 months)*
- Quebec Public Health Program.

Most notably, the province of Québec runs a universal program which covers basic services for children under 10 years of age. Programs indicated with an asterisk (*) cover dental restorations.

New Brunswick
The province of New Brunswick runs six publicly funded dental programs, including:

- New Brunswick Medicare
- the Health Services Program*
- the Health Services Enhanced Dental Program*
- the Cleft Palate Program
- the Fluoride Mouthrinse Program
- Healthy Smiles, Clear Visions.

New Brunswick covers preventive programs for elementary school children. Programs indicated with an asterisk (*) cover dental restorations.

Nova Scotia
The province of Nova Scotia runs nine publicly funded dental programs, including:

- the Nova Scotia Department of Health and Wellness Dental Surgical Program
- Income Assistance
- the Cleft Palate-Craniofacial Program
- the Maxillofacial Prosthodontics Program
- the Mentally Challenged Program Preamble*
- the Nova Scotia Children's Oral Health Program*
- the Fluoride Mouthrinse Program
- Children in Care*
- the Disability Support Program.

The province of Nova Scotia also funds notable programs that support populations such as residents who have a craniofacial anomaly, residents who require maxillofacial prosthodontic procedures, and residents with disabilities. Nova Scotia also covers prevention and restoration in children where private insurance pays first and the program pays for subsequent costs. Programs indicated with an asterisk (*) cover dental restorations.
Prince Edward Island
The province of Prince Edward Island runs four publicly funded dental programs, including:

- Hospital and Medical Services Insurance
- the Children's Oral Health Programs*
- Dental Public Health Services (Long-Term Care Residents)
- the Social Assistance Program.**

Other programs in Prince Edward Island include those that cover children who fall under certain oral health programs, including those with a cleft palate or those who have no private insurance, and one that covers long-term care residents. The program indicated with an asterisk (*) covers dental restorations. The program indicated with two asterisks (**) covers basic dental care, which may include some restoration.

Newfoundland and Labrador
The province of Newfoundland and Labrador runs five publicly funded dental programs, including:

- the Surgical Dental Program
- the Children's Dental Health Program*
- the Income Support Program*
- the Low Income Access Program*
- the Adult Dental Program.*

Most notably, Newfoundland and Labrador runs a universal program, which covers treatment for children regardless of income status, where private insurance pays first and the program pays for outstanding costs. Programs indicated with an asterisk (*) cover dental restorations.

Yukon
The territory of Yukon runs three publicly funded dental programs, including:

- the Children's Pre-School Dental Program
- the Children's School-Based Dental Program*
- Health Insurance Benefits.

A notable difference from the other provinces is that Yukon runs programs which cover restorative treatment in pre-school and school-age children. Programs indicated with an asterisk (*) cover dental restorations.

Northwest Territories
The Northwest Territories run six publicly funded programs, including:

- Non-Insured Health Benefits*
- Indigent Health Benefits**
- Extended Health Benefits Seniors’ Program*
- Dental Therapy Program, Métis Health Benefits*
- Extended Health Benefits for Specified Disease Conditions
  - Cleft Lip and Cleft Palate.
In addition to the general programs that other jurisdictions cover, the Northwest Territories also fund programs for seniors, children, and Indigenous Peoples. Programs indicated with an asterisk (*) cover dental restoration. The program indicated with two asterisks (**) cover some restoration in long-term recipients only.

**Nunavut**
The territory of Nunavut runs five publicly funded programs, including:

- In-Hospital Surgical Dental Services
- the Dental Therapy Program*
- Contracted Dental Services*
- the Nunavut Oral Health Pilot Project
- the Extended Health Benefits Full Coverage Plan.*

Most notable, Nunavut also covers programs for children, seniors who have no insurance plans, and Indigenous Peoples. Programs indicated with an asterisk (*) cover dental restorations.

**Federal Programs**
There are six federal programs that run publicly funded programs outside of the public service, including:

- National Defence and the Canadian Armed Forces*
- Veterans Affairs Canada*
- Royal Canadian Mounted Police*
- Correctional Services Canada**
- Citizenship and Immigration Canada*
- Department of Indigenous Services Canada, First Nations and Inuit Health Branch, Non-Insured Health Benefits (NIHB) Program.*

Programs indicated with an asterisk (*) cover dental restoration. The program indicated with two asterisks (**) covers basic services, which may include some dental restoration.

**Objective 2:** To obtain the annual number of services (claims) for composite resin (tooth-coloured) or amalgam fillings on permanent, posterior teeth that are funded by Canadian publicly funded dental programs

Surveys were distributed to key informants in all provinces and territories via email invitation. Of the 18 informants surveyed, two jurisdictions provided partial responses. The annual number of procedures involving composite resin or amalgam fillings that are funded by public dental programs could not be derived due to limited responses. Neither the literature search nor the survey provided sufficient information to answer this research question.

**Objective 3:** To compare reimbursement rates for dental restorative procedures across programs

The literature search provided the majority of evidence regarding the reimbursement rates for dental restorative procedures across programs in Canada. The only exception was Manitoba, where the rates were obtained directly from a survey respondent. No rates were identified for New Brunswick, Yukon, or Nunavut. All provinces and territories and federal
programs use the procedures codes developed by the Canadian Dental Association. One notable inconsistency identified is that Québec and Newfoundland and Labrador use different dental fee codes for their public programs. Although the focus on this report was on publicly funded dental programs, the suggested fee guides from provincial dental associations have also been included for reference. Each provincial dental association publishes a fee guide for professional information purposes as a reference for dental practitioners. The fee guides provide suggested fees for dental services performed under normal conditions in order to facilitate the development of a structure of fees fair and reasonable to patients, and to the practitioners, and was considered to provide a proxy measure for the cost of dental services in private settings. Some of the fee guides in this scan provide reimbursement rates for specific programs (e.g., the Ontario fee guide reports fees for their Healthy Smiles Program), while other fee guides provide reimbursement rates as a general fee schedule for public programs (e.g., British Columbia fee schedule reports fees for most of their public programs). As a majority of the Canadian population are not eligible for public dental programs, excluding these reimbursement rates from this scan would not be representative of the Canadian setting.

Reimbursement rates for dental procedures across public schedules of fees and programs varied from province to province. The following reimbursement rates are not direct comparisons but rather an observation of the range of costs we found across the jurisdictions. An amalgam permanent filling of a premolar on one surface costs the least in Ontario at $25.35 (Note: this is a children's program fee) and the most in Newfoundland and Labrador at $117.05; an amalgam permanent filling of a premolar on five surfaces costs the least in Ontario at $76.02 (Note: this is a children's program fee) and the most in Newfoundland and Labrador at $234.41. An amalgam permanent filling on a molar on one surface costs the least in Ontario at $31.68 (Note: this is a children's program fee) and the most in the Northwest Territories at $115.70. By contrast, an amalgam permanent filling on a molar on five surfaces costs the least in Ontario at $79.34 (Note: this a children's program fee) and costs the most in the Northwest Territories at $268.20.

Conversely, a composite resin permanent filling on a premolar on one surface costs the least in Ontario at $50.68 (Note: this is a children's program fee) and the most in the Northwest Territories at $145.20; a composite resin permanent filling on a premolar on five surfaces costs the least in Ontario at $114.04 (Note: this a children's program fee) and the most in the Northwest Territories at $306.30. A composite resin permanent filling on a molar on one surface costs the least in Ontario at $57.01 (Note: this is a children's program fee) and the most in the Northwest Territories at $156.30. By contrast, a composite resin permanent filling on a molar on five surfaces costs the least in Ontario at $123.66 (Note: this is a children's program fee) and costs the most in the Northwest Territories at $350.30. Québec, Prince Edward Island, and Manitoba do not report fees for composite restorations in their fee schedules. This is because composite resin restorations of posterior teeth are not covered by public programs, reducing access to this type of care.

Reimbursement rates for publicly funded programs, including the fees for the Non-Insured Health Benefits, can be found in Appendix 4. The average and standard deviations of private fee codes from British Columbia, Alberta, Saskatchewan, New Brunswick, and Nova Scotia can be found in Appendix 5.
Limitations

This Environmental Scan presents an overview of publicly funded dental programs and reimbursement rates for dental restorative procedures in Canada. A systematic search was not conducted; so all relevant information may not have been identified. The annual number of procedures involving composite resin or amalgam fillings funded by public dental programs was not obtained through the literature search or the survey. Further, the information identified through the literature search could not be validated due to the lack of survey responses. Therefore, programs not reported in the literature or captured in the grey literature sources may not be included. Since most Canadians rely on private insurance, it is equally important to highlight that these public reimbursement rates are not reflective of private reimbursement fees and should not be extrapolated. In terms of access to information, all of the jurisdictions provided information regarding their publicly funded dental programs on their government websites; however, reimbursement rates were particularly difficult to obtain from specific jurisdictions (New Brunswick, Yukon, and Nunavut). In rural and remote areas, rates may differ; practitioners may qualify for premiums, or the procedures may be based on a different fee guide. For Manitoba, the fee guide listed in this report (Appendix 4), which reflects more urban areas, varies from the fee guide for their rural and remote areas (one private insurer notes that fees in Northern Manitoba are about 10% higher than those in the Manitoba guide). The fees listed in the report are general practitioner fees, but there are also specialist care fees and fees for individuals with disabilities that tend to be higher fees. Moreover, it is understood that dental health programming is continuously evolving. The data contained in this report was up to date as of December 1, 2017; information may have changed since the publication of this report.

Conclusion

In 2015, PHAC undertook an Environmental Scan of publicly funded dental care in Canada to describe the available programs and detail the associated legislation and financing trends across Canada. The objective of the present Environmental Scan was to build on the previous work, but with an emphasis on reimbursement rates for dental restorative procedures, in order to inform the economic review for a CADTH HTA investigating whether dental amalgam should continue to be used in Canada.

In Canada, general oral health care is not included in the Canada Health Act, Canada’s federal legislation for publicly funded health care insurance. Canadians pay for dental care in four different ways: through third-party insurance (typically employment-related dental coverage), through private dental insurance, paying directly out of pocket, or through government-subsidized programs. When compared with other Organization for Economic Co-operation and Development nations, Canada ranks second to last in public financing of dental care. The Canadian Health Measures Survey conducted in 2010 found that 62.6% of Canadians had private insurance and only 5.5% of Canadians had public insurance coverage through publicly funded programs, leaving the rest of Canadians with no dental insurance and resulting in the need to pay out of pocket for dental services. Given the current state of affairs, this Environmental Scan observed considerable variability in the costs for dental services across Canada. This Environmental Scan excluded dental care provided by charitable organizations, universities, and private sector involvement.

All of the Canadian provinces and territories have their own unique set of publicly funded dental programs to supplement or fully cover the cost of dental care. These programs target key populations, including, but not limited to, children, Indigenous Peoples, seniors, adults
with disabilities, and individuals accessing employment insurance. They provide a wide array of services from preventive (e.g., fluoride treatments, dental sealants) to restorative dental care (e.g., amalgam or composite fillings, crowns). All of the provinces and territories provide services for residents who require emergency dental services. Most of the jurisdictions also fund programs that provide services for adults and children who require income assistance — with the exception of Yukon, the Northwest Territories, and Nunavut, which may be explained by the fact that those provinces receive funding from a separate federal program. Based on the findings of this Environmental Scan, Québec, Nova Scotia, Prince Edward Island, and Newfoundland and Labrador all provide restorative programs for children regardless of income. All children are covered in Québec, regardless of private insurance. Prince Edward Island covers children who have no private insurance. Nova Scotia and Newfoundland and Labrador cover subsequent charges that private insurance will not cover, as well as children who do not have private insurance, up to a maximum cost.

There was insufficient data identified to comment on the annual number of procedures involving composite resin or amalgam fillings that are funded by public dental programs.

Reimbursement rates for dental procedures across programs varied from province to province. The highest costs were reported in Northwest Territories, and may be partly explained by the potential difficulties obtaining resources. Demand far exceeds resources and it has been noted that there is a limited and diminishing pool of oral health care providers in the Northwest Territories.

In Canada, dental benefits fall under provincial and territorial jurisdictions. There are many inconsistencies across the country, and the jurisdiction in which residents live determines what kind of publicly funded dental care is available to them. Programs also vary in terms of level of coverage and types of services covered (including preventive to treatment). One larger issue is that dental care is not included in Canada’s national system of health insurance (Medicare).

This scan fulfilled the objectives of identifying and describing Canadian publicly funded dental programs and comparing reimbursement rates for dental restorative procedures, but we are unable to comment on the number of composite and amalgam restorations funded by public programs. Although the search was not systematic and there were limited survey responses, this Environmental Scan presents an overview of the current context around publicly funded dental programs and reimbursement rates across Canada. This report will be used to inform the economic review component of the CADTH HTA, addressing the following policy question: “Should dental amalgam continue to be used in Canada?” The HTA is anticipated to be published in the spring of 2018.

Draft Survey Questions — Public Dental Programs

General Information
1. What is your profession or role? (open-ended)
2. What is the name of your organization?
3. Are you currently involved in any capacity with a publicly funded dental care program? (Y/N) (If respond no, survey ends)
   - Please describe the nature of your involvement. (open-ended)
4. Which Canadian jurisdiction do you represent? Please select one.
   - Federal government
   - British Columbia
   - Alberta
   - Saskatchewan
   - Manitoba
   - Ontario
   - Québec
   - New Brunswick
   - Nova Scotia
   - Prince Edward Island
   - Newfoundland and Labrador
   - Nunavut
   - Northwest Territories
   - Yukon
   - Other (e.g., multiple)
Objective 1: To identify and describe Canadian publicly funded dental programs
The following question aims to identify publicly funded dental programs, including the size of the populations they serve.
5. What is/are the public dental program(s) you are representing? Please provide the name(s) of the program(s) and approximate size of the population served by each program?

| Medical Services Plan<sup>23</sup>                                      | All residents of BC who need dental or oral surgery that is medically required to be performed in a hospital                                                                                                                                                                                                                                         | • Medically required services provided by a physician enrolled with Medical Services Plan  
• Diagnostic services, including X-rays, provided at approved diagnostic facilities, when ordered by a registered physician, midwife, podiatrist, dental surgeon, or oral surgeon  
• Dental and oral surgery, when medically required to be performed in hospital (excluding restorative services, i.e., fillings, caps, crowns, root canals, etc.)<sup>a</sup>  
• Orthodontic services related to severe congenital facial abnormalities |
| Dental Supplements (including BC Employment and Assistance Program's Dental Program)<sup>24</sup> | • Adults who are eligible for general health supplements based on individuals who receive income or disability assistance  
• Adults with disabilities and persons with persistent multiple barriers  
• Coverage includes adults, their spouse, and children under 19-years-old | Adults:  
• Up to $1,000 over 2 calendar years, beginning on January 1 of every odd-numbered year for basic services  
• Basic dental services such as restorations, extractions, and preventative services  
• Partial dentures, replacement dentures, or reline/re-base of dentures  
• Crowns and bridges under certain circumstances  
Children (under 19-years-old):  
• Up to $2,000 over 2 calendar years, beginning on January 1 of every odd-numbered year  
• An additional $1,000 per year to cover the cost of dental treatment in hospital under general anesthetic |
| Healthy Kids<sup>25</sup>                                              | Children under 19-years-old in families approved for premium assistance by the Medical Services Plan through the Ministry of Health, based on an individual’s or family’s net income, family size, disability, and any reported Universal Child Care Benefit and Registered Disability Savings Plan income | • Children receive up to $2,000 over 2 calendar years for basic services<sup>5</sup>  
  ◦ Exams  
  ◦ X-rays  
  ◦ Fillings  
  ◦ Cleanings  
  ◦ Extractions |
| Early Childhood Health and Screening Programs<sup>26</sup>              | All children 0- to 5-years-old                                                                                                                                                                                                                                                                                                               | This program, delivered by public health staff, includes:  
• Fluoride varnish application  
• Dental screenings  
• Education  
• Family support |

</table>

BC = British Columbia.

\(^{27}\) For the Medical Services Plan the removal of healthy wisdom teeth is not a benefit. Surgical removal of an impacted third molar (wisdom tooth) is a Medical Services Plan insured service only when hospitalization is medically required, due to the extreme complexity of the extraction and where there is associated pathology.

\(^{29}\) Emergency treatment is available if the child has reached the $2,000 limit; it is available only for the immediate relief of pain. Orthodontics are not included.

| Alberta Health Care Insurance Plan, including the OMDS Program\(^{15,30,31}\) | All residents of Alberta                                                   | • Medically necessary oral surgical and dental procedures in a hospital or an accredited non-hospital surgical facility (deemed medically necessary by a physician)  
• Some specific dental, oral, and maxillofacial surgical services are fully covered  
• The OMDS may provide funding for some high-cost dental services required with an oral surgical procedure under the AHCIP |
| Assured Income for the Severely Handicapped Program\(^ {32}\) | • Adults who have a disability that limits their ability to earn a living (income level is based on pre-specified criteria)  
• Adults at least 18-years-old who are not eligible to receive an Old Age Security pension  
• Coverage also includes cohabiting partners and dependent children | • Services are that fully covered:  
○ Complete, recall, and emergency examinations  
○ Teeth cleaning  
○ X-rays  
○ Restorations (fillings)  
○ Extractions  
○ Dentures |
| Alberta Works Income Support\(^ {33}\) | • Albertans (individuals and families) in four general situations may qualify for support:  
○ Cannot work due to chronic health issues or other barriers to employment  
○ Looking for work, working but not earning enough, or temporarily unable to work  
○ Need training so they can get a job  
○ Faced with an unexpected, on-time emergency that is not fault of their own  
• Includes children up to age 18, and up to age 20 if they live at home and are attending high school | • Basic services like extractions and fillings are fully covered  
• Additional services like teeth cleaning and annual examinations are fully covered for children |
| Alberta Child Health Benefit\(^ {34}\) | • This program is designed for children in families with limited incomes (if the family makes $26,023 or less per year, one child can be signed up; for each additional child, add $4,973)  
• Children up to age 18 who live at home  
• Children up to age 20 if they live at home and are attending high school up to grade 12 | • Services that are fully covered:  
○ X-rays  
○ Dental exams  
○ Teeth cleaning  
○ Fillings and extractions |

</table>
| Alberta Adult Health Benefit Plan[^33]       | • Individuals who are pregnant and have limited income (if a single individual's income is under $16,580, they can qualify; maximum qualifying income increases with children and spouse)  
• Individuals who have high ongoing prescription drug needs and limited income  
• Individuals who leave Income Support and have income from employment, self-employment, or the Canada Pension Plan Disability program  
• Individuals who leave Assured Income for the Severely Handicapped (AISH) and have income from employment, self-employment, or the Canada Pension Plan Disability program | • Basic services like extractions and fillings are fully covered  
• Some additional services like teeth cleaning and annual examinations are also covered |
| School Oral Health Services[^35]             | • Children in Kindergarten, Grade 1, and Grade 2                             | • Fluoride varnish provided to:  
  ◦ Kindergarten  
  ◦ Grade 1  
  ◦ Grade 2  
• Dental sealants provided to:  
  ◦ Grade 1  
  ◦ Grade 2 |
| Dental Assistance for Seniors Program[^36]    | • Residents 65 years of age or older who have an income level within the limits allowed by the program:  
  ◦ Single senior: income must be $31,675 or under  
  ◦ Senior couple: income must be $63,350 or under | • A maximum of $5,000 of coverage for eligible procedures every 5 years based on income  
• Services include:  
  ◦ Diagnostic services – examinations and X-rays  
  ◦ Preventative services – polishing and scaling  
  ◦ Restorative services – fillings, trauma/pain control/pins  
  ◦ Extractions – simple and complicated  
  ◦ Root canals (Endodontics)  
  ◦ Procedures relating to gum disease (Periodontics) – root planing  
  ◦ Dentures (Prosthodontics) – full and partial basic dentures |
| Reduced-Fee Dental Care for Qualified Low-Income Clients[^37] | For adults and children in Alberta who:  
  • Live on a poverty-line income (varies depending on how many individuals are in the family, e.g., 1 person family income cut-off is $24,949)  
  • Have no access to a group dental insurance plan | • Available service fees are approximately 20% of the Alberta Usual and Customary Fee Guide for Dental Services and include:  
  ◦ Check-ups  
  ◦ Extractions  
  ◦ Fillings  
  ◦ Front Tooth Root Canals  
  ◦ Panorex (panoramic radiograph)  
  ◦ Scaling  
  ◦ X-rays |

</thead>
</table>
| **Saskatchewan Medical Services Plan – Partially Covered Services**<sup>15,41</sup> | All residents of Saskatchewan | • Specific oral surgery procedures required to treat specific conditions caused by accidents, infection, congenital problems, or other factors performed in a hospital or private practice; this includes infants and children with cleft palate  
• Extracting teeth when medically required before undertaking certain surgical procedures  
• Dental implants in exceptional situations where no other method of treatment is appropriate (i.e., circumstances related to tumours and congenital defects) |
| **Family Health Benefits**<sup>42</sup> | Low-income working families who meet the standards of an income test or are receiving the Saskatchewan Employment Supplement or the Saskatchewan Rental Housing Supplement | • Children are fully covered for most dental services  
• Parents or legal guardians may apply for additional coverage under the Special Support program |
| **Supplementary Health Benefits**<sup>43</sup> | This program provides assistance to:  
• Government wards  
• Inmates of provincial correctional institutions  
• Residents of special care facilities who are eligible for the Senior’s Income Plan  
• Those in specific income support programs (eligibility for this coverage is determined by the Ministry of Social Services) including:  
  • Saskatchewan Assured Income for Disability  
  • Saskatchewan Assistance Program  
  • Transitional Employment Allowance  
  • Provincial Training Allowance | • Dental Services Emergency Benefits (coverage is limited to relieving pain and controlling infection)  
  • If residents are 18-years-old or older and are able to work, they and their spouse are eligible only for emergency dental benefits for 6 months. After 6 months, residents become eligible for full benefits.  
• Basic dental services are fully covered including:  
  • Preventive  
  • Restorative  
  • Endodontic  
  • Prosthetic |
| **Enhanced Preventive Dental Services Initiative**<sup>44</sup> | This preventive program<sup>*</sup> is implemented at the regional level in schools in the regions with the highest need – these areas include Athabasca, Keewatin Yathë, Mamawetan Churchill River, Prince Albert/Parkland, Prairie North, Regina Qu’Appelle, and Saskatoon | • Full coverage for this program includes:  
  • Oral health assessments  
  • Referral and follow-up  
  • Fluoride varnish  
  • Dental sealants |

<sup>*</sup>Focus on disease prevention and health promotion targeting early childhood tooth decay in at-risk population.

| **Ontario Health Insurance Plan**                            | All residents of Ontario for surgical dental services as prescribed under the *Health Insurance Act* | • Fracture repair  
• Tumour removal  
• Reconstructive surgeries  
• Medically necessary tooth removal (prior approval by OHIP is required)  
• Performed by specialists or generalists in hospitals |
| **The Ontario Cleft Lip and Palate/Craniofacial Dental Program** | Residents of Ontario who have a diagnosed cleft lip and/or palate, a craniofacial anomaly, or other severe dental dysfunction. Individuals must be registered in the program before their 18th birthday. | • 75% of the pre-approved dental specialist treatment costs not covered by private dental insurance, which may include:  
  ○ Dental infant orthopedics  
  ○ Orthodontic treatment  
  ○ Some restorative dentistry  
  ○ Dental prosthetics  
  ○ Dental implants and oral surgery not funded by OHIP |
| **Healthy Smiles Ontario**                                   | Children and youth 17-years-old and under from low-income households whose family net income is $22,760 or lower with 1 child and increases by $1,722 for each additional child | • The program fully covers the costs of treatment including:  
  ○ Check-ups  
  ○ Cleaning  
  ○ Fillings  
  ○ X-rays  
  ○ Scaling  
  ○ Urgent or emergency dental care |
| **Oral and Maxillofacial Reconstruction Program**             | • Applicants must be 18 years of age and older  
• Applicants must also be eligible for an ADP Maxillofacial Intraoral Prosthesis | Covers 100% of the treatment costs for a defined list of services including the surgical placement of dental implants and the modifications to the ADP-funded prosthesis that are required to attach it to the implants |
| **Ontario Works Adults – Extended Health Benefits**           | • Residents of Ontario who require money immediately to pay for food and shelter and are willing to take part in activities that will help them find a job  
• Residents who have high health costs and no longer qualify for financial help from Ontario Works; Extended Health Benefits may be available to help cover the costs | Basic dental carea |
| **Assistance for Children with Severe Disabilities**          | Children who are < 18 years of age and have a severe disability | Depending on the income and size of the family, the program may provide between $25 and $470 a month to help with costs such as dental care |
| **Ontario Disability Support Program**                        | ODSP recipients and their spousesb | Basic dental servicesa |

| **Ontario Disability Support Program – Dental Special Care Plan**<sup>56</sup> | • ODSP recipients and their spouses  
• In addition to basic dental services, recipients and eligible spouses may receive services under the Dental Special Care Plan | • Additional dental services for those whose disability, prescribed medications, or prescribed medical treatment affects their oral health (e.g., radiation of head/neck, diuretics, diabetes)<sup>c</sup> |
| **Régie de l’assurance maladie du Québec**<sup>57</sup> | All residents of Québec                          | • Certain oral surgery services delivered in hospital that are medically necessary due to trauma or disease including:  
• Certain bone grafts  
• Drainage of an abscess  
• Removal of a cyst or tumour  
• Reduction of a fracture  
• Also includes, related examinations, local or general anesthesia, X-rays |
| **Régie de l’assurance maladie du Québec for Children**<sup>57</sup> | All children under the age of 10 regardless if child has other coverage | Complete coverage includes:  
• One examination per year  
• Emergency examinations  
• X-rays  
• Local or general anesthesia  
• Amalgam fillings for the posterior teeth  
• Composite fillings for the anterior teeth  
• Prefabricated crowns  
• Sedative dressings  
• Endodontics  
• Tooth and root extractions  
• The oral surgery services covered for everyone  
• Costs related to cleaning, scaling, fluoride application, and pit and fissure sealing are not covered |

ADP = Assistive Devices Program; ODSP = Ontario Disability Support Program; OHIP = Ontario Health Insurance Plan.

| Régie de l’assurance maladie du Québec Low Income Program – 12 and 24 months¹⁷             | Recipients of last-resort financial assistancea and their dependants for at least 12 or 24 months determined by the Ministère du Travail, de l’Emploi et de la Solidarité sociale  
• To be eligible for last-resort financial assistance, residents must prove that their resources are equal or less than the amounts prescribed by regulation                                                                                     | Recipients of last-resort financial assistance for at least 12 consecutive months include:  
• One examination per year  
• Emergency examinations  
• X-rays  
• Local or general anesthesia  
• Amalgam fillings for the posterior teeth  
• Composite fillings for the anterior teeth  
• Prefabricated crowns  
• Endodontics  
• Tooth and root extractions  
• Oral surgery services covered for everyone  
• Cleaning of teeth and teaching hygiene procedures from age 12  
• Application of fluoride, age 12 to 15 inclusive  
• Scaling from age 16  
Recipients of last-resort financial assistance for at least 24 consecutive months include all services indicated above and special written authorization is needed for the following services:  
• One lower dental prosthesis and one upper acrylic dental prosthesis every 8 years  
• One re-coating every 5 years  
• Half the cost of replacing lost or damaged dental prostheses  
• Replacement of prostheses following surgery  
• Repair of prostheses  
• Addition of structure  
In emergencies only, for recipients of last-resort financial assistance for less than 12 consecutive months, services include:  
• Tooth and root extractions  
• Opening of the pulp chamber  
• Drainage of an abscess  
• Hemorrhage control  
• Repair of a soft tissue laceration  
• Reduction of an alveolar fracture  
• Immobilization of a tooth loosened by trauma  
• Re-implantation of a complete exfoliated tooth                                                                                                                                                                                                                                                                               |
| Québec Public Health Program – Dental Health⁵⁸                                               | All children aged 5 to 15 regardless if child has other coverage                                                                                                                                                                                                                                                                                                                                   | • Applying a dental sealant to the surfaces of permanent molars with sulcus and fissures  
• Provides individualized preventive follow-up in schools so that kindergarten to grade 3 children who meet the criteria for a high risk of dental caries receive two topical applications of fluoride per year                                                                                                                                                                                                                                                                 |

¹ Details of inclusion criteria unclear.

| Health Services Dental Program<sup>60</sup> | • Clients from the Department of Social Development and their dependants 19 years of age and older  
• Individuals who have special health needs (e.g., qualifying disabilities) and qualify for assisted health care | Basic Services Included:  
• Exams, X-rays  
• Dentures and repairs  
• Specific types of fillings  
Coverage:  
• Clients are eligible for a maximum of $1,000 per year, excluding emergency and prosthetic services  
• Clients will be charged a 30% participation fee for dentures and denture repair |
| Health Services Enhanced Dental Program<sup>61</sup> | Eligible clients are:  
• Between the ages of 20 and 63  
• Participating in Career Development Options programming<sup>a</sup>  
• In need of additional treatment to support employment or educational goals  
Clients are eligible for this program for one year with the option to renew annually for a maximum of three years | Services included:  
• Complete oral examination  
• Cleaning  
• Scaling/root planing  
• Root canal on anterior teeth  
Coverage:  
• Clients are eligible for a maximum of $1000 per year, excluding emergency and prosthetic services |
| Cleft Palate Program<sup>15</sup>     | Children 0 to 19 years of age who have a cleft of the hard palate; eligibility is income based | Orthodontic care<sup>b</sup> |
| Fluoride Mouthrinse Program<sup>62</sup> | Elementary school children across the province may participate in the program free of charge in schools that have opted to provide this service | Fluoride solution once a week |
| Healthy Smiles, Clear Visions<sup>63</sup> | Children of low-income families with no insurance plans  
• Dependent children aged 18 years or younger  
• Not have dental and vision coverage through another government program or private insurance  
• A family net income level not exceeding a certain amount; income varies from $22,020 to $41,196 depending on family size | This program provides full coverage for the following dental benefits:  
• Regular exams  
• X-rays and extractions  
• Some preventative treatments such as sealants and fluorides |

<sup>a</sup> Services offered to all clients receiving social assistance who have potential for employment.

| National Defence and the Canadian Armed Forces        | Members of the reserve force and their dependants who work for the Canadian Armed Forces                                                                                                                  | Full-spectrum dental care is completely covered including:  
  - Extensive dental procedures (e.g., root canal treatment, placement of a bridge, crown, or dentures)  
  - Orthodontic services                                                                                                                                                                                                                                                                    |
| Veterans Affairs Canada Dental Services               | Veterans may qualify to receive financial support for treatment benefits, if they are in receipt of:  
  - A disability benefit  
  - The Veterans Independence Program  
  - Financial assistance through the Long Term Care program  
  - The War Veterans Allowance                                                                                                                                           | Provides coverage for:  
  - Basic dental care  
  - Annual basic treatments up to $1,500 annually  
    - Exams, polish, and fluoride treatments every 9 months  
    - Scaling (8 units per year)  
    - Fillings and extractions  
  - Standard dentures once every 7 years  
  - Some pre-authorized comprehensive dental services  
    - Basic treatment exceeding $1,500 annually  
    - Crowns  
    - Bridgework (X-rays required)  
    - Specialist treatment (referral required)  
    - Early replacement of dentures as determined by your dentist or denturist  
  - VAC dental program covers up to 100% of the rates in the provincial dental/denturist association fee guide  
  - Orthodontics services                                                                                                                                                                                                            |
| Royal Canadian Mounted Police                          |  
  - Full-time and part-time employees who are employed for more than 6 months  
  - Eligible spouse or common-law partner and eligible dependent children of employee members                                                                                                                        | Basic services (90% coverage) include:  
  - Examination and diagnosis  
    - Recall oral examination limited to once every 9 months  
    - Complete examination limited to once every 36 months  
  - Routine preventive services (dental cleaning, polishing, and fluoride application limited to once every nine months)  
  - Minor restorative procedures  
  - Endodontics (root canal)  
  - Periodontics (treatment of gum disease)  
  - Minor prosthodontic services (repairs, adjustments, rebasing, and relining of removable dentures once every 36 months)  
  - Oral surgery  
  - Adjunctive services (anesthesia in connection with oral surgery and emergency services)  
  - Major services (50%) include:  
    - Major restorative services (crowns once every 60 months, inlays)  
    - Complete or partial dentures, fixed bridges (dentures once every 60 months)  
  - Orthodontics (50%) include:  
    - Orthodontics services                                                                                                                                                                                                  |

| Citizenship and Immigration Canada                            | The Interim Federal Health Program provides limited, temporary coverage of health care benefits to people who are not eligible for provincial or territorial health insurance:  
  • Protected persons, including resettled refugees  
  • Refugee claimants  
  • Certain other groups  
  The program will not cover any expenses already covered by insurance | • The Interim Federal Health Program provides limited, temporary coverage of health care benefits including:  
  ◦ Oral exams  
  ◦ X-rays  
  ◦ Caries, trauma, pain control  
  ◦ Writing or dispensing an emergency prescription  
  ◦ Amalgam/composite restoration (requires pre-authorization)  
  ◦ Extractions  
  ◦ Denture relines  
  ◦ Complete and partial dentures  
  ◦ Denture repairs  
  ◦ General anesthesia |
| Department of Indigenous Services Canada, First Nations and Inuit Health Branch, NIHB Program<sup>27</sup> | An eligible client must be a resident of Canada and one of the following:  
  • A registered Indian according to the Indian Act  
  • An Inuk recognized by one of the Inuit Land Claim organizations  
  • An infant less than 18 months, whose parent is an eligible recipient | • The following services are covered:  
  ◦ Diagnostic (exams and X-rays)  
  ◦ Preventive  
  ◦ Restorative  
  ◦ Endodontic  
  ◦ Periodontal  
  ◦ Removable prosthodontic  
  ◦ Oral surgery  
  ◦ Orthodontic  
  ◦ Adjunctive |

NIHB = Non-Insured Health Benefits; VAC = Veterans Affairs Canada.
<sup>a</sup> Details regarding what is included in this program are unclear.

</table>

AB = Alberta; BC = British Columbia; E = Examination Fees; excl = excluding; L = Laboratory Fees; MB = Manitoba; NA = not available; NB = New Brunswick; NL = Newfoundland and Labrador; NS = Nova Scotia; NT = Northwest Territories; NU = Nunavut; ON = Ontario; PEI = Prince Edward Island; QC = Québec; SK = Saskatchewan; YT = Yukon.

b Source was available, but the author of this report considered it out of date (1984).

c Newfoundland and Labrador uses different public fee codes.

d Québec has unique fee codes: amalgam (non-bonded) permanent premolar are identified as 21231-5, amalgam (non-bonded) permanent molar are identified as 21241-5, composite resin (bonded) permanent premolar are identified as 23211-5, and composite resin (bonded) permanent molars are identified as 23221-5; an additional unique crown code: 27413 = $145.00.

e Average of the adult and child fee.

f Ontario fees come from the Healthy Smiles Ontario program fee schedule.

g Alberta fees come from the Dental Assistance for Seniors program fee schedule.

h Premolars are also referred to as bicuspids and anterior by the Canadian Dental Association.

Note: some of the fee codes listed in this table are quoted from one specific public program (e.g., Ontario), while other codes are general fee schedules for multiple public programs (e.g., British Columbia).
