**Disclaimer:** The Environmental Scanning Service is an information service for those involved in planning and providing health care in Canada. Environmental Scanning Service responses are based on a limited literature search and are not comprehensive, systematic reviews. The intent is to provide information on a topic that CADTH could identify using all reasonable efforts within the time allowed. Environmental Scanning Service responses should be considered along with other types of information and health care considerations. The information included in this response is not intended to replace professional medical advice nor should it be construed as a recommendation for or against the use of a particular health technology. Readers are also cautioned that a lack of good quality evidence does not necessarily mean a lack of effectiveness, particularly in the case of new and emerging health technologies for which little information can be found but that may in future prove to be effective. While CADTH has taken care in the preparation of the report to ensure that its contents are accurate, complete, and up to date, CADTH does not make any guarantee to that effect. CADTH is not liable for any loss or damages resulting from use of the information in the report. Copyright: This report contains CADTH copyright material. DRAFT

### **Context**

Dental caries is a significant oral health problem worldwide.<sup>1</sup> While the epidemiology of dental caries over time and across populations has changed — due to such factors as economic development, sugar consumption, and community water fluoridation — it remains an important cause of human morbidity. Symptoms can include pain and tooth loss, and downstream sequelae (e.g., school or work absenteeism) that negatively impact activities of daily living may result.<sup>2</sup> In Canada, data from 2007 show that 57% of children aged 6 to 11 years, 59% of adolescents aged 12 to 19 years, and 96% of adults have a history of dental caries.<sup>3</sup>

Standard treatment for dental caries aims to restore the structure of the affected tooth using filling material to replace decayed dental tissue.<sup>4</sup> Amalgam fillings have been widely used for more than 150 years<sup>5</sup> and evidence suggests that amalgam has been an effective and affordable dental restorative material.<sup>5-7</sup> However, the perceived health risks and potential environmental impact of dental amalgam, due to the mercury it contains, are debated. On the international front, the Minamata Convention on Mercury, which Canada ratified in April 2017,<sup>8</sup> specifically addresses the use of amalgam in dentistry.<sup>9</sup> One concern arising from the proposed phasing down (and eventually phasing out) of dental amalgam is the impact on the cost of dental care — which is a barrier for some populations in Canada.<sup>3,10</sup>

Among the alternatives to the use of amalgam as a restorative material for dental caries, composite resin is the most common, having been in use for over 50 years.<sup>11</sup> Composite resin, because it is tooth coloured, may provide an advantage over amalgam for visible restorations in anterior teeth for esthetic reasons.<sup>12</sup> Nonetheless, evidence has shown that long-term failure rates of fillings made of composite resin are greater than those made of amalgam.<sup>5</sup> Evidence also suggests that restorations made of composite resin have both a higher initial, and long-term, cost as compared with those made of amalgam.<sup>13</sup> Concerns have also been raised around the safety of composite resin restorations due to potential toxicity of some composite resin materials that may contain bisphenol A or its derivatives.<sup>14</sup>

In Canada, the majority of dental care is privately financed, commonly through employment-based insurance and out-of-pocket expenses.<sup>15</sup> In 2010, the Canadian Health Measures Survey reported that 62.6% of Canadians had private insurance and only 5.5% of Canadians had coverage through publicly funded programs, while 31.9% were uninsured.<sup>16</sup> All jurisdictions publicly fund dental programs for “various groups, predominantly low income populations, with the federal system largely defined by the care it targets to First Nations and Inuit populations, but including services for the armed forces, Veterans Affairs, RCMP [Royal Canadian Mounted Police], prisoners, and Citizenship and Immigration Canada”.<sup>15</sup> The characteristics of those programs, such as dental services covered, eligibility criteria, and reimbursement models, vary depending on the jurisdiction and the particular program. An environmental scan report on publicly financed dental care programs in Canada was published in 2015 under the direction of the Public Health Agency of Canada (PHAC) and covered several topic areas including identification of programs and legislation related to provincial and territorial public dental care activities, enumeration and remuneration of dental public health human resources, rates of reimbursement, and expenditures of direct and indirect service delivery activity.<sup>17</sup> Nonetheless, the scan did not provide a comprehensive guide to reimbursement rates for dental restorative procedures across publicly funded dental programs.

In this context, CADTH is undertaking a Health Technology Assessment (HTA) which will address the following policy question: Should dental amalgam continue to be used in Canada? The aim of the HTA is to inform the policy question through a comparative assessment of dental amalgam and composite resin — the most commonly used alternative. The economic review component of the HTA will address the following research question: What are the comparative consequences and costs of using dental restorations made of composite resin or amalgam for permanent teeth in Canada? Specifically, a cost-consequence analysis will be undertaken to compare costs and health outcomes associated with dental amalgams and composite resin as dental restorative materials for permanent posterior teeth.

This project was adapted from the aforementioned PHAC environmental scan report on publicly financed dental care programs in Canada.<sup>17</sup> In contrast to the broader scope of the PHAC report, this

environmental scan focusses on gathering information on the costs and utilization of dental restorative procedures offered under the public dental care programs, with the aim of informing the economic review component of the HTA.

## **Objectives**

The objective of this Environmental Scan is to identify and summarize information regarding public dental programs and reimbursement for dental restorative procedures.

The following objectives are addressed:

1. To identify and describe Canadian publicly funded dental programs
2. To obtain the annual number of procedures involving composite resin (tooth-coloured) or amalgam fillings that are funded by public dental program
3. To compare reimbursement rates for dental restorative procedures across programs

## **Methods**

This Environmental Scan is based on responses to the public dental programs survey (Appendix 1) and a limited literature search.

**Table 1 Components and Information Gathering Approach**

		<b>Inclusion</b>	<b>Exclusion</b>
<b>Components</b>	<b>Population</b>	Patients of any age with dental caries who receive a dental restorative procedure under a public dental care program	NA
	<b>Intervention</b>	Any form of dental restorative procedures covered under a public dental care program, including, but not limited to, dental filling restorations with amalgam or composite resin, restoration repairs, restorations with a dental crown	NA
	<b>Setting</b>	Any setting providing dental restorative care funded under a federal, provincial, or territorial public oral care program	Municipal government programs
	<b>Outcomes</b>	<ul style="list-style-type: none"><li>• Identification and description of public dental care programs Volume of restorations (i.e., number of amalgam and composite resin procedures)</li><li>• Dental fees for restorative procedures</li></ul>	NA
<b>Information gathering approach</b>	Consultation <input type="checkbox"/>		
	Survey <input checked="" type="checkbox"/>		
	Literature search: <input checked="" type="checkbox"/>		

NA = not applicable

### **Literature Search**

Grey literature was identified by searching relevant sections of the [Grey Matters checklist](#). A focused Internet search was also conducted. Identified articles were screened for selection and those that met the inclusion criteria (see Table 1) will be synthesized and summarized within the report.

### **Research Questions**

The literature review component of this environmental scan aimed to address the following questions:

1. What are the publicly funded federal, provincial, and territorial (F/P/T) dental programs in Canada?
2. What groups of patients are eligible under each program?
3. What are the current fee schedules in publicly funded F/P/T dental programs for dental restorative procedures?

## **Survey**

A survey was conducted to address gaps in knowledge not addressed by the literature search and to increase the robustness of findings. The survey was distributed electronically using Hosted in Canada Surveys (HICS) to key jurisdictional informants and stakeholders involved in planning, decision making, management, and service provision related to public dental care in Canada. Attempts were made to contact one respondent per jurisdiction and/or known publicly funded dental care program in order to capture information relevant to all Canadian programs. Survey respondents provided an electronic signature to consent to the reporting of the information provided. Respondents were identified through existing contacts from the PHAC as well as knowledge of respondents from the previous environmental scan.

## **Findings**

---

The information presented on publicly funded dental programs and reimbursement for dental procedures in Canada is based on a literature search. Due to the low number and lack of complete survey responses, any available survey findings are included as personal communications.

### **Objective 1: Identify and describe Canadian publicly funded dental programs**

The literature search identified evidence regarding publicly funded dental programs across Canada. Content was also derived from and cross-referenced with the previous environmental scan to fill in any gaps from the literature search.<sup>17</sup> The following public dental programs were identified from the limited literature search. Programs not reported in the literature or captured from our grey literature sources may not be included. In addition, due to limitations of the literature search, it is possible that not all sources of information on public dental programs were identified.

Emergency dental services are covered in all of the provinces and territories across Canada. All of the provinces also fund programs that provide services for adults and children who require income assistance; these programs are not funded in the territories. All of the provinces and territories provide prevention and/or treatment services for children regardless of income, except for Ontario. Details of the publicly funded dental programs can be found in Appendix 3; Tables 2-15.

### **British Columbia**

The province of British Columbia runs six publicly funded dental programs, including:

- The Medical Services Plan
- Dental Supplements (including British Columbia Employment and Assistance Program's Dental Program)
- Healthy Kids, Early Childhood Health and Screening Programs
- The Children in Care Medical Benefits Program
- The First Nations Health Authority covers two programs:
  - The Children's Oral Health Initiative

- The First Nations Health Authority Health Benefits Program.

Most notably, British Columbia has specific programs for First Nations. British Columbia is unique in that the Non-Insured Health Benefits (NIHB) program is managed by the First Nations Health Authority.

### **Alberta**

The province of Alberta runs 10 publicly funded dental programs, including:

- The Alberta Health Care Insurance Plan
- The Assured Income for the Severely Handicapped Program
- Alberta Works Income Support
- The Alberta Child Health Benefit Plan
- The Alberta Adult Health Benefit Plan
- School Oral Health Services
- The Dental Assistance for Seniors Program
- Reduced-Fee Dental Care for Qualified Low-Income Clients
- Family Support for Children with Disabilities
- The Cleft Palate Dental Indemnity Program

The province of Alberta has additional programs geared towards adults and families with disabilities, seniors below a certain income level, and residents who have a cleft palate.

### **Saskatchewan**

The province of Saskatchewan runs four publicly funded dental programs, including:

- The Saskatchewan Medical Services Plan
- Family Health Benefits
- The Supplementary Health Program
- The Enhanced Preventive Dental Services Initiative

Saskatchewan runs notable programs that cover individuals on disability and target school-aged children, providing many preventive dental services administered across the province at the regional level.

### **Manitoba**

The province of Manitoba runs four publicly funded dental programs, including:

- Manitoba Health Care Coverage
- The Employment and Income Assistance Program
- Healthy Smile Happy Child
- The SMILE plus Children's Oral Health Program

Manitoba also covers preventive services for children in certain regional health authorities.

### **Ontario**

The province of Ontario runs seven publicly funded dental programs, including:

- The Ontario Health Insurance Plan
- The Ontario Cleft Lip and Palate/Craniofacial Dental Program
- Healthy Smiles Ontario
- The Oral and Maxillofacial Reconstruction Program
- Ontario Works Adults

- Assistance for Children with Severe Disabilities
- The Ontario Disability Support Program:
  - The Special Dental Care Program

Ontario has programs to support residents who have a cleft lip and/or palate, residents who require oral and maxillofacial reconstruction, and adults and children with disabilities.

### **Québec**

The province of Québec runs four publicly funded dental programs, including:

- Régie de L'Assurance Maladie Du Québec,
- Régie de L'Assurance Maladie du Québec for Children
- The Régie de L'Assurance Maladie du Québec Low Income Program (12 and 24 months)
- The Québec Public Health Program

Most notably, the province of Québec covers basic and preventive services for children or youth 15 years of age or younger.

### **New Brunswick**

The province of New Brunswick runs six publicly funded dental programs, including:

- New Brunswick Medicare
- The Health Services Program
- The Health Services Enhanced Dental Program
- The Cleft Palate Program
- The Fluoride Mouthrinse Program
- Healthy Smiles, Clear Visions

New Brunswick covers programs for children who have a cleft of the hard palate and preventive programs for elementary school children.

### **Nova Scotia**

The province of Nova Scotia runs nine publicly funded dental programs, including:

- The Nova Scotia Department of Health and Wellness Dental Surgical Program
- Income Assistance
- The Cleft Palate-Craniofacial Program
- The Maxillofacial Prosthodontics Program
- The Mentally Challenged Program Preamble
- The Nova Scotia Children's Oral Health Program
- The Fluoride Mouthrinse Program
- Children in Care
- The Disability Support Program

The province of Nova Scotia also funds notable programs that support populations such as residents who have a craniofacial anomaly, residents who require maxillofacial prosthodontic procedures, residents with disabilities, and care for children under a specific age.

### **Prince Edward Island**

The province of Prince Edward Island runs four publicly funded dental programs, including:

- Hospital and Medical Services Insurance
- The Children's Oral Health Programs
- Dental Public Health Services (Long-Term Care Residents)
- The Social Assistance Program

Other programs in PEI include those that cover children who fall under certain oral health programs, including those with a cleft palate or those who have no private insurance, and one that covers long-term care residents.

### **Newfoundland and Labrador**

The province of Newfoundland and Labrador runs five publicly funded dental programs, including:

- The Surgical Dental Program
- The Children's Dental Health Program
- The Income Support Program
- The Low Income Access Program
- The Adult Dental Program.

Newfoundland and Labrador also funds a program that covers treatment for children, regardless of income status.

### **Yukon**

The territory of Yukon runs three publicly funded dental programs, including:

- The Children's Pre-School Dental Program
- The Children's School-Based Dental Program
- Health Insurance Benefits

Programs that cover pre-school and school-age children are also funded in Yukon.

### **Northwest Territories**

The Northwest Territories run six publicly funded programs, including:

- Non Insured Health Benefits
- Indigent Health Benefits
- the Extended Health Benefits Seniors' Program
- Dental Therapy Program, Métis Health Benefits
- Extended Health Benefits for Specified Disease Conditions
  - including Cleft Lip and Cleft Palate

Northwest Territories also fund programs for seniors, children, and Indigenous Peoples.

### **Nunavut**

The territory of Nunavut runs five publicly funded programs, including:

- In-Hospital Surgical-Dental Services
- The Dental Therapy Program
- Contracted Dental Services
- The Nunavut Oral Health Pilot Project
- The Extended Health Benefits Full Coverage Plan

Nunavut also covers programs for children, seniors who have no insurance plans, and Indigenous Peoples.

### **Federal Programs**

There are six federal programs that run publicly funded programs outside of the public service, including:

- National Defence and the Canadian Armed Forces
- Veterans Affairs Canada
- Royal Canadian Mounted Police
- Correctional Services Canada
- Citizenship and Immigration Canada
- Health Canada First Nations and Inuit Health Branch

DRAFT

**Objective 2: To obtain the annual number of procedures involving composite resin (tooth-colored) or amalgam fillings that are funded by public dental program**

Surveys were distributed to key informants in all provinces and territories via e-mail invitation. Of the 18 informants surveyed, two jurisdictions provided partial responses. The annual number of procedures involving composite resin or amalgam fillings that are funded by public dental programs could not be derived from due to limited responses. Neither the literature search nor the survey provided sufficient information to answer this research question.

DRAFT

### **Objective 3: To Compare Reimbursement Rates for Dental Restorative Procedures across Programs**

The literature search identified evidence the majority of evidence regarding reimbursement rates for dental restorative procedures across programs in Canada. The only exception was Manitoba, where the rates were obtained directly from a survey respondent. No rates were identified for New Brunswick, Yukon, or Nunavut. One notable inconsistency identified is the different dental fee codes used by Newfoundland and Labrador. Although the focus on this report was on publicly funded dental programs, the averages of private fees have been included for reference since these fees apply to the majority of the Canadian population and excluding them would not be representative of the Canadian setting.

Reimbursement rates for dental procedures across programs varied from province to province. An amalgam permanent filling of a premolar on one surface costs the lowest in Québec at \$40.25 and the highest in Newfoundland and Labrador at \$117.05; an amalgam permanent filling of a premolar on five surfaces costs the lowest in British Columbia at \$118.29 and the highest in Alberta at \$252.08. An amalgam permanent filling on a molar on one surface costs the lowest in Québec at \$53.25 and the highest in Northwest Territories at \$115.70; in contrast, an amalgam permanent filling on a molar on five surfaces costs the lowest in British Columbia at \$143.21 and costs the highest in Alberta at \$271.08.

Conversely, a composite resin permanent filling on a premolar on one surface costs the lowest in Québec at \$72.75 and the highest in Alberta at \$146.13; a composite resin permanent filling on a premolar on five surfaces costs the lowest in Nova Scotia at \$185.32 and the highest in Alberta at \$327.42. A composite resin permanent filling on a molar on one surface costs the lowest in Nova Scotia at \$82.92 and the highest in Northwest Territories at \$156.30; in contrast, a composite resin permanent filling on a molar on five surfaces costs the lowest in Nova Scotia at \$207.84 and costs the highest in Alberta at \$345.42.

Reimbursement rates for publicly funded programs, including the fees for the Non-Insured Health Benefits, can be found in Appendix 4; the averages of private reimbursement fees can be found in Appendix 5 (note: data forthcoming).

### **Limitations**

This Environmental Scan presents an overview of publicly funded dental programs and reimbursement rates for dental restorative procedures in Canada. A systematic search was not conducted so, as a result, some literature with information relevant to this report may not have been identified. We were unable to obtain the annual number of procedures involving composite resin or amalgam fillings funded by public dental programs through the literature search or the survey. Further, the information identified through the literature search could not be validated due to the lack of survey responses. Therefore, programs not captured from our grey literature sources may not be included. Since most Canadians rely on private insurance, it is equally important to highlight that these public reimbursement rates are not reflective of private reimbursement fees and should not be extrapolated. In terms of access of information, all of the jurisdictions provided information regarding their publicly funded dental programs on their government websites; however, reimbursement rates were particularly difficult to obtain from specific jurisdictions (New Brunswick, Yukon, and Nunavut). Moreover, the data contained in this report was taken from sources in the Fall of 2017; information may have changed since the publication of this report.

### **Conclusion**

---

In 2015, PHAC undertook an environmental scan of publicly funded dental care in Canada to describe the available programs and programming reimbursement rates of provincial fee guides across Canada.<sup>17</sup> The objective of the present Environmental Scan was to build on the previous work in order to inform the economic review for a CADTH HTA investigating whether dental amalgam should continue to be used in Canada.

In Canada, general oral health care is not included in the Canada Health Act, Canada's federal legislation for publicly funded health care insurance.<sup>18</sup> Canadians pay for dental care in four different ways — through third-party insurance (typically employment-related dental coverage), through private dental insurance, paying directly out of pocket, or through government-subsidized programs.<sup>19</sup> When compared with other Organization for Economic Co-operation and Development nations, Canada ranks second to last in public financing of dental care.<sup>20</sup> The Canadian Health Measures Survey conducted in 2010 found that 62.6% of Canadians had private insurance and only 5.5% of Canadians had public insurance coverage through publicly funded programs, leaving the rest of Canadians with no dental insurance and resulting in the need to pay out-of-pocket for dental services.<sup>16</sup>

All of the Canadian provinces and territories have their own unique publicly funded dental programs to supplement or fully cover the cost of dental care. These programs target key populations, including, but not limited to, children, Indigenous Peoples, seniors, adults with disabilities, and individuals accessing employment insurance. They provide a wide array of services from preventative (e.g., fluoride treatments, dental sealants) to restorative dental care (e.g., amalgam or composite fillings, crowns). All of the provinces and territories provide services for residents who require emergency dental services. Most of the jurisdictions also fund programs that provide services for adults and children who require income assistance, with the exception of Yukon, the Northwest Territories, and Nunavut. All of the provinces and territories provide prevention and/or treatment services for children regardless of income, except for Ontario. Additionally, Alberta, Ontario, New Brunswick, and Nova Scotia all fund programs that support residents who have a cleft of the hard palate.

There was insufficient data identified to comment on the annual number of procedures involving composite resin or amalgam fillings that are funded by public dental programs.

Reimbursement rates for dental procedures across programs varied from province to province. An amalgam permanent filling on a molar on one surface costs the lowest in Québec at \$53.25 and the highest in Northwest Territories at \$115.70; in contrast, an amalgam permanent filling on a molar on five surfaces costs the lowest in British Columbia at \$143.21 and costs the highest in Alberta at \$271.08. Conversely, a composite resin permanent filling on a molar on one surface costs the lowest in Nova

Scotia at \$82.92 and the highest in Northwest Territories at \$156.30; in contrast, a composite resin permanent filling on a molar on five surfaces costs the lowest in Nova Scotia at \$207.84 and costs the highest in Alberta at \$345.42. The high costs in Northwest Territories can be explained as it is a poorly resourced environment.<sup>21</sup> Demand far exceeds resources and it has been noted that there is a limited and diminishing pool of oral health care providers in the Northwest Territories.<sup>21</sup> Although Northwest Territories has the highest rates for permanent fillings on a molar on one surface, Alberta claims that their fees are the highest in Canada.<sup>22</sup> Alberta has expressed concerns about the high cost and lack of transparency of the dental service fees; in an attempt to try and control these fees, the Alberta government and Alberta Dental Association and College have developed a fee guide.<sup>22</sup>

In Canada, dental benefits fall under provincial and territorial jurisdictions. There are many inconsistencies across the country, and the jurisdiction in which residents live determines what kind of publicly funded dental care is available. Programs also vary in terms of level of coverage and types of services covered, from preventive to treatment-based. This scan fulfilled the objectives of identifying and describing Canadian publicly funded dental programs and comparing reimbursement rates for dental restorative procedures, but we are unable to comment on the number of procedures funded. Although the search was not systematic and there were limited survey responses, this Environmental Scan presents an overview of the current context around publicly funded dental programs and reimbursement rates across Canada. This report will be used to inform the economic review component of the CADTH HTA, addressing the following policy question: Should dental amalgam continue to be used in Canada? The HTA is anticipated to be published in the spring of 2018.<sup>23</sup>

DRAFT

## **Appendix 1: Survey: Public Dental Programs and Reimbursement for Dental Restorative Procedures**

### **Draft Survey Questions – Public Dental Programs**

#### **General Information**

1. What is your profession or role? (open ended)
2. What is the name of your organization
3. Are you currently involved in any capacity with a publicly funded dental care program? (Y/N) (If respond no, survey ends)
  - o Please describe the nature of your involvement (open ended)
4. Which Canadian jurisdiction do you represent? Please select one.
  - o Federal government
  - o British Columbia
  - o Alberta
  - o Saskatchewan
  - o Manitoba
  - o Ontario
  - o Québec
  - o New Brunswick
  - o Nova Scotia
  - o Prince Edward Island
  - o Newfoundland and Labrador
  - o Nunavut
  - o Northwest Territories
  - o Yukon
  - o Other (e.g., multiple)

#### **Objective 1: To identify and describe Canadian publicly funded dental programs**

The following question aims to identify publicly funded dental programs, including the size of the populations they serve.

5. What is/are the public dental program(s) you are representing? Please provide the name(s) of the program(s) and approximate size of the population served by each program?

Program Name	Population Size

#### **Objective 2: To obtain the annual number of procedures involving composite resin (tooth-colored) or amalgam fillings that are funded by public dental programs**

The following questions pertain to the number of restoration procedures performed on an annual basis.

6. How many amalgam and composite resin (tooth-colored) restorations of permanent posterior teeth were claimed under your program(s) during the last fiscal year for which data is available?

Please indicate the fiscal year: \_\_\_\_\_

Overall number of restorations: \_\_\_\_\_

**Draft Survey Questions – Public Dental Programs**

**Please indicate the specific number of restorations per fee code below:**

<b>Code</b>	<b>Details</b>	<b>Number of Restorations</b>
<b>21211</b>	AMALGAM (non-bonded) – PERMANENT PREMOLAR – 1 surface	
<b>21212</b>	AMALGAM (non-bonded) – PERMANENT PREMOLAR – 2 surfaces	
<b>21213</b>	AMALGAM (non-bonded) – PERMANENT PREMOLAR – 3 surfaces	
<b>21214</b>	AMALGAM (non-bonded) – PERMANENT PREMOLAR – 4 surfaces	
<b>21215</b>	AMALGAM (non-bonded) – PERMANENT PREMOLAR – 5 surfaces	
<b>21221</b>	AMALGAM (non-bonded) – PERMANENT MOLAR – 1 surface	
<b>21222</b>	AMALGAM (non-bonded) – PERMANENT MOLAR – 2 surfaces	
<b>21223</b>	AMALGAM (non-bonded) – PERMANENT MOLAR – 3 surfaces	
<b>21224</b>	AMALGAM (non-bonded) – PERMANENT MOLAR – 4 surfaces	
<b>21225</b>	AMALGAM (non-bonded) – PERMANENT MOLAR – 5 surfaces	
<b>23311</b>	COMPOSITE RESIN (bonded) – PERMANENT PREMOLAR – 1 surface	
<b>23312</b>	COMPOSITE RESIN (bonded) – PERMANENT PREMOLAR – 2 surfaces	
<b>23313</b>	COMPOSITE RESIN (bonded) – PERMANENT PREMOLAR – 3 surfaces	
<b>23314</b>	COMPOSITE RESIN (bonded) – PERMANENT PREMOLAR – 4 surfaces	
<b>23315</b>	COMPOSITE RESIN (bonded) – PERMANENT PREMOLAR – 5 surfaces	
<b>23321</b>	COMPOSITE RESIN (bonded) – PERMANENT MOLAR – 1 surface	
<b>23322</b>	COMPOSITE RESIN (bonded) – PERMANENT MOLAR – 2 surfaces	
<b>23323</b>	COMPOSITE RESIN (bonded) – PERMANENT MOLAR – 3 surfaces	
<b>23324</b>	COMPOSITE RESIN (bonded) – PERMANENT MOLAR – 4 surfaces	
<b>23325</b>	COMPOSITE RESIN (bonded) – PERMANENT MOLAR – 5 surfaces	

(The following table is for Newfoundland only)

7. Of the restorations in your response to question number 6, what proportion was considered a first restoration (as opposed to subsequent restoration on a tooth that has received prior restoration)?

Restoration Material	Proportion of First Restoration (%)
Amalgam	— Unknown
Composite resin	— Unknown

Please indicate whether the proportion noted is based on data or an estimate:

- Data
- Estimate

**Objective 3: To compare reimbursement rates for dental restorative procedures across programs**

The following questions ask about the reimbursement rates for amalgam and composite resin (tooth-colored) restorations of permanent posterior teeth

7. Are you able to provide a copy of your fee schedule for your dental program(s) that includes information regarding the restorations listed in question number 6? (Y/N) If yes, please upload or submit to [kelseys@cadth.ca](mailto:kelseys@cadth.ca).
8. Of the restorations in your response to question number 5, which procedure codes were most frequently used? Please indicate the procedure fees for these most frequently used codes.

**Table 2: Summary of Publicly Funded Dental Programs in British Columbia**

<b>Program</b>	<b>Eligibility</b>	<b>Dental Services Covered</b>
<b>Medical Services Plan<sup>24</sup></b>	All residents of BC who need dental or oral surgery that is medically required to be performed in a hospital	<ul style="list-style-type: none"> <li>• “Medically required services provided by a physician enrolled with [Medical Services Plan]</li> <li>• Diagnostic services, including x-rays, provided at approved diagnostic facilities, when ordered by a registered physician, midwife, podiatrist, dental surgeon, or oral surgeon</li> <li>• Dental and oral surgery, when medically required to be performed in hospital (excluding restorative services, i.e., fillings, caps, crowns, root canals, etc.)<sup>a</sup></li> <li>• Orthodontic services related to severe congenital facial abnormalities”</li> </ul>
<b>Dental Supplements (including BC Employment and Assistance Program’s Dental Program)<sup>25</sup></b>	<ul style="list-style-type: none"> <li>• Adults who are eligible for general health supplements based on individuals who receive income or disability assistance</li> <li>• Adults with disabilities and persons with persistent multiple barriers</li> <li>• Coverage includes adults, their spouse, and children under 19 years old</li> </ul>	<p>Adults</p> <ul style="list-style-type: none"> <li>• “Up to \$1,000 over two calendar years, beginning on January 1 of every odd-numbered year for basic services</li> <li>• Basic dental services such as restorations, extractions, and preventative services</li> <li>• Partial dentures, replacement dentures, or reline/re-base of dentures</li> <li>• Crowns and bridges under certain circumstances”</li> </ul> <p>Children (under 19 years old)</p> <ul style="list-style-type: none"> <li>• “Up to \$2,000 over two calendar years, beginning on January 1 of every odd-numbered year</li> <li>• An additional \$1,000 per year to cover the cost of dental treatment in hospital under general anesthetic”</li> </ul>
<b>Healthy Kids<sup>26</sup></b>	Children under 19 years old in families approved for premium assistance by the Medical Services Plan through the Ministry of Health based on an individual’s or family’s net income, family size, disability, and any reported Universal Child Care Benefit and Registered Disability Savings Plan income	<ul style="list-style-type: none"> <li>• Children receive up to \$2,000 over two calendar years for basic services<sup>b</sup> <ul style="list-style-type: none"> <li>○ “Exams</li> <li>○ X-rays</li> <li>○ Fillings</li> <li>○ Cleanings</li> <li>○ Extractions”</li> </ul> </li> </ul>
<b>Early Childhood Health and Screening Programs<sup>27</sup></b>	All children 0 to 5 years old	<p>This program, delivered by public health staff, includes:</p> <ul style="list-style-type: none"> <li>• Fluoride varnish application</li> <li>• Dental screenings</li> <li>• Education</li> <li>• Family support</li> </ul>
<b>Children in Care Medical Benefits Program<sup>28</sup></b>	<ul style="list-style-type: none"> <li>• Children and youth in care of the Ministry of Children and Family Development</li> </ul>	<ul style="list-style-type: none"> <li>• Basic and major restorative dental coverage to a maximum of \$700 per year</li> <li>• Services that are funded:</li> </ul>

	<ul style="list-style-type: none"> <li>Children and youth in the care of Delegated Aboriginal Agencies</li> </ul>	<ul style="list-style-type: none"> <li>“Diagnostic</li> <li>Preventative</li> <li>Restorative</li> <li>Endodontic</li> <li>Periodontics</li> <li>Prosthodontic</li> <li>Anesthesia</li> <li>Oral surgical services”</li> <li>Orthodontic services</li> </ul>
<b>First Nations Health Authority – Children's Oral Health Initiative<sup>29</sup></b>	First Nations children 0 to 7 years old, their parents/caregivers, and pregnant women (all must reside on-reserve)	<ul style="list-style-type: none"> <li>Annual screenings</li> <li>Fluoride varnish</li> <li>Dental sealants</li> <li>Temporary fillings</li> <li>Oral health education</li> </ul>
<b>First Nations Health Authority Health Benefits Program<sup>30</sup></b>	<ul style="list-style-type: none"> <li>Must be a registered “Indian” according to the Indian Act or the infant of an eligible parent</li> <li>Must be a resident of British Columbia</li> <li>Must not be funded or insured under any other benefit system or benefit plans provided by Federal legislation or a First Nations Organization</li> </ul>	<ul style="list-style-type: none"> <li>“Diagnostic services (e.g., examinations or x-rays)</li> <li>Preventive Services (e.g., cleanings)</li> <li>Restorative services (e.g., fillings)</li> <li>Endodontic services (e.g., root canals)</li> <li>Periodontal services (e.g., deep cleanings)</li> <li>Prosthodontic services (e.g., removable dentures)</li> <li>Oral surgery services (e.g., removal of teeth)</li> <li>Orthodontic services (e.g., braces)</li> <li>Adjunctive services (e.g., general anesthetic or sedation)”</li> </ul>

BC = British Columbia

<sup>a</sup>The removal of healthy wisdom teeth is not a benefit. Surgical removal of an impacted third molar (wisdom tooth) is an Medical Services Plan insured service only when hospitalization is medically required, due to the extreme complexity of the extraction and where there is associated pathology.

<sup>b</sup>Emergency treatment is available if the child has reached the \$2,000 limit; it is available only for the immediate relief of pain. Orthodontics are not included.

**Table 3: Summary of Publicly Funded Dental Programs in Alberta**

Program	Eligibility	Dental Services Covered
<b>Alberta Health Care Insurance Plan, including the Oral and Maxillofacial Devices and Services Program<sup>17,31,32</sup></b>	All residents of Alberta	<ul style="list-style-type: none"> <li>Medically necessary oral surgical and dental procedures in a hospital or an accredited non-hospital surgical facility (deemed medically necessary by a physician)</li> <li>Some specific dental, oral, and maxillofacial surgical services are fully covered</li> <li>The OMDS may provide funding for some high-cost dental services required with an oral surgical procedure under the AHCIP</li> </ul>
<b>Assured Income for the Severely Handicapped Program<sup>33</sup></b>	<ul style="list-style-type: none"> <li>Adults who have a disability that limits their ability to earn a living (income level is based on pre-specified criteria)</li> <li>Adults at least 18 years old who are not eligible to receive an Old Age Security pension</li> <li>Coverage also includes cohabiting partners and dependent children</li> </ul>	<ul style="list-style-type: none"> <li>Services are that fully covered: <ul style="list-style-type: none"> <li>Complete, recall, and emergency examinations</li> <li>Teeth cleaning</li> <li>X-rays</li> <li>Restorations (fillings)</li> <li>Extractions</li> <li>Dentures</li> </ul> </li> </ul>
<b>Alberta Works Income</b>	<ul style="list-style-type: none"> <li>Albertans (individuals and</li> </ul>	<ul style="list-style-type: none"> <li>Basic services like extractions and fillings are</li> </ul>

<p><b>Support<sup>34</sup></b></p>	<p>families) in four general situations may qualify for support:</p> <ul style="list-style-type: none"> <li>○ Cannot work due to chronic health issues or other barriers to employment</li> <li>○ Looking for work, working but not earning enough, or temporarily unable to work</li> <li>○ Need training so they can get a job</li> <li>○ Faced with an unexpected, on-time emergency that is not fault of their own</li> <li>● Includes children up to age 18, and up to age 20 if they live at home and are attending high school</li> </ul>	<ul style="list-style-type: none"> <li>● fully covered Additional services like teeth cleaning and annual examinations are fully covered for children</li> </ul>
<p><b>Alberta Child Health Benefit Plan<sup>35</sup></b></p>	<ul style="list-style-type: none"> <li>● This plan is designed for children in families with limited incomes (if the family makes \$26,023 or less per year, one child can be signed up; for each additional child, add \$4,973)</li> <li>● Children up to age 20 who live at home</li> <li>● Children up to age 20 if they live at home and are attending high school up to grade 12</li> </ul>	<ul style="list-style-type: none"> <li>● Services that are fully covered: <ul style="list-style-type: none"> <li>○ X-rays</li> <li>○ Dental exams</li> <li>○ Teeth Cleaning</li> <li>○ Fillings and extractions</li> </ul> </li> </ul>
<p><b>Alberta Adult Health Benefit Plan<sup>34</sup></b></p>	<ul style="list-style-type: none"> <li>● Individuals who are pregnant and have limited income (if a single individual's income is under \$16,580, they can qualify; maximum qualifying income increases with children and spouse)</li> <li>● Individuals who have high ongoing prescription drug needs and limited income</li> <li>● Individuals who leave Income Support and have income from employment, self-employment, or the Canada Pension Plan Disability program</li> <li>● Individuals who leave Assured Income for the Severely Handicapped</li> </ul>	<ul style="list-style-type: none"> <li>● Basic services like extractions and fillings are fully covered</li> <li>● Some additional services like teeth cleaning and annual examinations are also covered</li> </ul>

	(AISH) and have income from employment, self-employment, or the Canada Pension Plan Disability program	
<b>School Oral Health Services<sup>36</sup></b>	<ul style="list-style-type: none"> <li>Children in Kindergarten, Grade 1, and Grade 2</li> </ul>	<ul style="list-style-type: none"> <li>Fluoride varnish provided to: <ul style="list-style-type: none"> <li>Kindergarten</li> <li>Grade 1</li> <li>Grade 2</li> </ul> </li> <li>Dental sealants provided to: <ul style="list-style-type: none"> <li>Grade 1</li> <li>Grade 2</li> </ul> </li> </ul>
<b>Dental Assistance for Seniors Program<sup>37</sup></b>	<ul style="list-style-type: none"> <li>Residents 65 years of age or older and have an income level within the limits allowed by the program <ul style="list-style-type: none"> <li>Single senior: income must be \$31,675 or under</li> <li>Senior couple: income must be \$63,350 or under</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>A maximum of \$5,000 of coverage for eligible procedures every five years based on income</li> <li>Services include: <ul style="list-style-type: none"> <li>"Diagnostic services – examinations and x-rays</li> <li>Preventative services – polishing and scaling</li> <li>Restorative services – fillings, trauma/pain control/pins</li> <li>Extractions – simple and complicated</li> <li>Root canals (Endodontics)</li> <li>Procedures relating to gum disease (Periodontics) – root planing</li> <li>Dentures (Prosthodontics) – full and partial basic dentures"</li> </ul> </li> </ul>
<b>Reduced-Fee Dental Care for Qualified Low-Income Clients<sup>38</sup></b>	<p>For adults and children in Alberta who:</p> <ul style="list-style-type: none"> <li>Live on a poverty-line income (varies depending on how many individuals are in the family, e.g., 1 person family income cut-off is \$24,949)</li> <li>Have no access to a group dental insurance plan</li> </ul>	<ul style="list-style-type: none"> <li>Available service fees are approximately 20% of the Alberta Usual and Customary Fee Guide for Dental Services and include: <ul style="list-style-type: none"> <li>Check-ups</li> <li>Extractions</li> <li>Fillings</li> <li>Front Tooth Root Canals</li> <li>Panorex (panoramic radiograph)</li> <li>Scaling</li> <li>X-rays</li> </ul> </li> </ul>
<b>Family Support for Children with Disabilities<sup>39,40</sup></b>	Children under 18 who have a disability	<ul style="list-style-type: none"> <li>Assistance with some of the disability-related costs for dental care</li> <li>The need for the treatment must be directly related to the child's disability</li> <li>The treatment must be recommended by the dental review committee</li> <li>The disability related costs exceed what is covered by the guardian's dental insurance plan or if the guardian does not have a dental insurance or benefit plan, the costs exceeding \$250.00 per 12 month period</li> </ul>
<b>Cleft Palate Dental Indemnity Program<sup>41</sup></b>	<p>Alberta residents who:</p> <ul style="list-style-type: none"> <li>Under the age of 25 and covered under the Alberta</li> </ul>	<ul style="list-style-type: none"> <li>Diagnostic services that are fully covered include: <ul style="list-style-type: none"> <li>One initial complete</li> </ul> </li> </ul>

	<p>Health Care Insurance Plan</p> <ul style="list-style-type: none"> <li>• Have a congenital cleft affecting the hard palate</li> <li>• Registered at a Cleft Palate Clinic in Alberta</li> </ul>	<ul style="list-style-type: none"> <li>examination per specialty</li> <li>○ One recall examination per 12-month period</li> <li>○ A maximum of two recall examinations performed by an oral and maxillofacial surgeon relating to a procedure not covered under the Alberta Health Care Insurance Plan</li> </ul> <ul style="list-style-type: none"> <li>• Preventive services that are fully covered include:</li> <li>○ One unit of scaling, polishing, and fluoride treatment per 12-month period</li> <li>○ One unit of dental related nutritional counselling/oral hygiene instruction per 12-month period for pediatric patients with high caries</li> <li>○ Pit and fissure sealants once per tooth for the first permanent molars and the two teeth on either side of the cleft</li> </ul> <ul style="list-style-type: none"> <li>• Restorative services that are fully covered include:</li> <li>○ Basic restorative services for two teeth on either side of the cleft</li> </ul> <ul style="list-style-type: none"> <li>• Endodontic services that are fully covered include:</li> <li>○ Maintenance of permanent dentition on the two teeth on either side of the cleft</li> </ul> <ul style="list-style-type: none"> <li>• Periodontic services that are fully covered include:</li> <li>○ Maintenance and stability of teeth and soft tissues directly associated with the cleft site or the abutment teeth involved in the prosthetic restoration of missing teeth associated with the cleft</li> </ul> <ul style="list-style-type: none"> <li>• Prosthodontic services that are fully covered include:</li> <li>○ Removable and fixed prostheses to replace missing teeth in the cleft area</li> <li>○ Replacement of a removable or fixed prosthesis after 5 years from the initial placement if deemed necessary</li> <li>○ Dental implants are covered on a one-time basis only</li> <li>○ A maximum of one denture reline per 3-year period</li> <li>○ Neonatal appliances when prescribed by the treating specialist physician or oral and maxillofacial surgeon</li> </ul> <ul style="list-style-type: none"> <li>• Oral and maxillofacial surgery services that are fully covered include:</li> </ul>
--	---	--

		<ul style="list-style-type: none"> <li>○ Dental extraction coverage may include those teeth associated with the cleft that are supernumerary, malformed, or non-functional and/or extractions of premolars where extraction is required</li> <li>○ A pre-surgical work-up when required</li> <li>● General anesthesia services that are fully covered include:           <ul style="list-style-type: none"> <li>○ Pre-authorized general and neurolept anesthesia</li> </ul> </li> <li>● Orthodontic services that are fully covered include:           <ul style="list-style-type: none"> <li>○ All active treatment, insertion of retainers, orthodontic records, observation appointments, radiographs, and retention observation appointments</li> </ul> </li> </ul>
