CADTH RAPID RESPONSE REPORT: REFERENCE LIST

Diagnosis and Treatment of Multiple Sclerosis: Guidelines
Research Question
What are the evidence-based guidelines for the full spectrum of care (including diagnosis and treatment) of patients with multiple sclerosis?

Key Findings
One evidence-based guideline was identified regarding the full spectrum of care (including diagnosis and treatment) of patients with multiple sclerosis.

Methods
A limited literature search was conducted on key resources including PubMed, The Cochrane Library, University of York Centre for Reviews and Dissemination (CRD) databases and a focused Internet search. Methodological filters were applied to limit retrieval to guidelines. The search was limited to English language documents published between January 1, 2012 and December 19, 2017. Internet links were provided, where available.

Selection Criteria
One reviewer screened citations and selected studies based on the inclusion criteria presented in Table 1.

Table 1: Selection Criteria

<table>
<thead>
<tr>
<th>Population</th>
<th>Adults (&gt; 18 years) patients with multiple sclerosis</th>
</tr>
</thead>
<tbody>
<tr>
<td>Intervention</td>
<td>Diagnostic methods (including screening, diagnostic tools, and devices); Treatment methods (including pharmacological and non-pharmacological treatment)</td>
</tr>
<tr>
<td>Comparator</td>
<td>No comparator</td>
</tr>
<tr>
<td>Outcomes</td>
<td>Guidelines</td>
</tr>
<tr>
<td>Study Designs</td>
<td>Evidence-based guidelines</td>
</tr>
</tbody>
</table>

Results
One evidence-based guideline was identified regarding the full spectrum of care (including diagnosis and treatment) of patients with multiple sclerosis.
