Title: Frequency of Physiotherapy for Orthopaedic Conditions

Date: August 14, 2007

Research question: What is the effect of the frequency of physiotherapy for orthopaedic conditions on clinical outcomes and cost-effectiveness?

Methods: A literature search was conducted on key health technology assessment resources, including PubMed, University of York Centre for Reviews and Dissemination (CRD) databases, ECRI’s HTAIS, and a focused Internet search. Results include English language publications from 2002 to date. Links to online full-text or abstracts are provided when available.

Results:

Health technology assessments

None found

Systematic reviews

General guidelines and recommendations

None found
Economic studies
