Title: The Use of MRI to Plan Radiotherapy: Clinical Effectiveness

Date: 06 December 2007

Research question:

What is the evidence that MRI can be used to plan radiotherapy treatment in cancer patients?

Methods:

A limited literature search was conducted on key health technology assessment resources, including PubMed, the Cochrane Library (Issue 4, 2007), University of York Centre for Reviews and Dissemination (CRD) databases, ECRI, EuroScan, international HTA agencies, and a focused Internet search. Results include articles published between 2003 and the present, and are limited to English language publications only. Filters were applied to limit the retrieval to systematic reviews, guidelines and randomized controlled trials. Internet links are provided, where available.

Results:

Health technology assessments
No literature identified

Systematic reviews and meta-analyses
No literature identified

Randomized controlled trials
No literature identified
Observational studies

Guidelines and recommendations

No literature identified
