TITLE: Diagnosis and Management of Cannabinoid Hyperemesis Syndrome: Guidelines

DATE: 25 June 2012

RESEARCH QUESTION

What are the evidence-based guidelines regarding the diagnosis and treatment of cannabinoid hyperemesis syndrome?

KEY MESSAGE

No relevant evidence-based guidelines regarding the diagnosis and treatment of cannabinoid hyperemesis syndrome were identified. Case reports and literature reviews are included in the appendix.

METHODS

A limited literature search was conducted on key resources including PubMed, The Cochrane Library (2012, Issue 6), University of York Centre for Reviews and Dissemination (CRD) databases, Canadian and abbreviated lists of major international health technology agencies, as well as a focused Internet search. No filters were applied to limit the retrieval by study type. Where possible, retrieval was limited to the human population. The search was also limited to English language documents published between Jan 1, 2007 and Jun 15, 2012. Internet links were provided, where available.

The summary of findings was prepared from the abstracts of the relevant information. Please note that data contained in abstracts may not always be an accurate reflection of the data contained within the full article.

RESULTS

Rapid Response reports are organized so that the higher quality evidence is presented first. Therefore, health technology assessment reports, systematic reviews, and meta-analyses are presented first. These are followed evidence-based guidelines.
No relevant health technology assessment reports, systematic reviews, meta-analyses, or evidence-based guidelines regarding the diagnosis and treatment of cannabinoid hyperemesis syndrome. Additional references of potential interest are provided in the appendix.

OVERALL SUMMARY OF FINDINGS

No relevant literature was found regarding the diagnosis and treatment of cannabinoid hyperemesis syndrome, therefore no summary can be provided.
REFERENCES SUMMARIZED

Health Technology Assessments
No literature identified.

Systematic Reviews and Meta-analyses
No literature identified.

Guidelines and Recommendations
No literature identified.
